Preface

This bibliography presents a comprehensive listing of Public Health Service publications on occupational health subjects issued through the year 1952, and the publications that appeared during part of the year 1953. It combines and brings up to date two previous bibliographies, now out of print, *Publications by the Division of Industrial Hygiene, National Institute of Health, and Other Public Health Service Publications on Industrial Hygiene Subjects, January 2, 1943*, and *Publications by Industrial Hygiene Division and Other Public Health Service Publications on Industrial Hygiene Subjects, 1942-47, Inclusive*. In part, it also supplements the out of print *Bibliography of Industrial Hygiene, 1909-1943, A Selected List*, which was published as Public Health Bulletin No. 289.

The purpose of this bibliography is to provide a complete and continuing record for reference use. It calls to the attention of the readers, particularly those new to occupational health, voluminous information on early pioneering studies and other contributions by the Public Health Service to the detection and control of occupational diseases. At the same time, by reflecting changes in subject matter from year to year, it affords an historical perspective of shifting interests in the field of occupational health and serves as an index of progress.

Precise classification of the subject matter has been difficult because of its heterogeneous nature. Consequently, in addition to the table of contents, where the publications have been broadly classified, a relatively detailed subject index has been provided. In the bibliography proper, the items have been listed chronologically under the subject headings, the most recent publications appearing last. In the subject index, the items under the various subjects have been alphabetically arranged.

In the publications index are gathered the different publications issued by the Public Health Service which are referred to in the bibliography. These publications, classified according to the series in which they appeared, not only give the reader a quick view of major Public Health Service activities in occupational health but also help to identify the subject matter of a particular publication when only its series and number are known.

Single sample copies of Public Health Service publications are available free of charge from the Public Inquiries Branch, Public Health Service, Washington 25, D. C. Quantities may be purchased from the Superintendent of Documents, Government Printing Office, Washington 25, D. C.

Publications which are out of print, as designated by the initials o.p., and papers which appeared in the technical press outside the Public Health Service are not available for distribution. They may be consulted at medical or technical libraries and at most large public libraries.

December 3, 1968

Bibliography

CHEMISTRY

ANALYTICAL

General

- (1) Outline of methods of sampling and analysis of air contaminants. Goldman, F. H. Division of Industrial Hygiene, National Institutes of Health, Bethesda, Md., 1943. Processed. O.p.
- (2) Analysis of air contaminants; methods in war industries. Goldman, F. H. *Indust. Med.* 13: 100, 1944.
- (3) Analytic methods in diagnosis. Fairhall, L. T. *Occup. Med.* 3: 13, 1947.
- (4) Laboratory procedures in industrial hygiene. Goldman, F. H. U. S. Public Health Service, Georgia Dept. Pub. Health, and Georgia School of Technology, 1947. Processed. O.p.

Inorganic

- (5) The titanate acid method for quantitative determination of carbon monoxide in the blood. Sayers, R. R., and Yant, W. P. *Pub. Health Rep.* 37: 2483, 1922. Reprint No. 700. O. p. Bur. Mines, Rep. Invest. 2850, 1922. O. p.
- (6) Collection and preservation of blood samples for determination of carbon monoxide. Sayers, R. R.; O'Brien, H. R.; Jones, G. W.; and Yant, W. P. *Pub. Health Rep.* 38: 2085, 1923. Reprint No. 803. O. p.
- (7) The pyrotannic acid method for the quantitative determination of carbon monoxide in blood and air. Sayers, R. R.; Yant, W. P.; and Jones, G. W. *Public Health Rep.* 36: 2811, 1922. Reprint No. 572. O. p. Bur. Mines, Rep. Invest. 2486, 1922. O. p.
- (8) The pyrotannic acid method for the quantitative determination of carbon monoxide in blood and in air. Its use in the diagnosis and investigation of cases of carbon monoxide poisoning. Sayers, R. R., and Yant, W. P. *Bur. Mines, Tech. Paper* 378, 1923. O. p.

(9) The quantitative determination of quartz ("free Silica") in dusts. Knopf, A. *Pub. Health Rep.* 48: 132, 1933. Reprint No. 1660. O. p.

(10) Methods for the determination of quartz in industrial dusts. Goldman, F. H. *Pub. Health Rep.* 62: 1702, 1937. Reprint No. 1882. O. p.

(11) Precision methods in the determination of the heavy metals. Fairhall, L. T. *Am. J. Pub. Health* 28: 825, 1938.

(12) Hydrofluosilicic acid method for determination of quartz. Goldman, F. H. *Indust. & Eng. Chem., Anal. Ed.* 18: 780, 1941.

(13) Specific atmospheric contaminants—carbon monoxide. Report of subcommittee on chemical methods in air analysis. American Public Health Association. Goldman, F. H., chairman. *Am. Pub. Health Assoc. Year Book*, 1940-41, p. 119. Supp. to *Am. J. Pub. Health* 31: No. 3, 1941.

(14) A rapid method for the interanalysis of lead. Fairhall, L. T., and Keenan, R. G. *J. Am. Chem. Soc.* 63: 3076, 1941.

(15) A comparison of methods for the determination of carbon monoxide. Goldman, F. H., and Brandt, A. D. *Am. J. Pub. Health* 32: 475, 1942. Abstr., *J. Indust. Hyg. & Toxicol.* 24: 142a, 1942.

(16) Colorimetric determination of fluoride in natural waters with thorium and aluminum. Thelville, M. A. *Indust. & Eng. Chem., Anal. Ed.* 15: 620, 1943.

(17) The determination of borates in atmospheric dusts. Yagoda, H. *J. Indust. Hyg. & Toxicol.* 20: 224, 1944.

(18) The microdetermination of silibine. Webster, S. H., and Fairhall, L. T. *J. Indust. Hyg. & Toxicol.* 27: 183, 1945.

(19) A method for the determination of iron in welding fume samples. Keenan, R. G., and Minderman, B. L. *J. Indust. Hyg. & Toxicol.* 28: 32, 1946.

(20) The development of the Marsh test for arsenic. Webster, S. H. *J. Chem. Educ.* 24: 487, 1947.

(21) Sampling and determination of chlorine in air. Wallach, A., and McQuary, W. A. *Am. Indust. Hyg. A. Quart.* 9: 43, 1948.

(22) A study of dithione as a reagent for iodine. May, I., and Hoffman, J. I. *J. Washington Acad. Sci.* 38: 329, 1948.

(23) Investigation of atmospheric contaminants. Collection and determination. Phillips, H. J.; Hasey, A. D.; Crothers, R. B.; and Byers, D. H. *Air pollution in Denver, Pa.* *Pub. Health Bull. No. 308*, U. S. Public Health Service, 1949. P. 81.

(24) Potential sources of error in blood lead determinations due to different methods of blood sampling. Stigmarer, R., and May, I. *Arch. Indust. Hyg. & Occup. Med.* 1: 407, 1950.

(25) Qualitative and quantitative determination of toxic materials in water supplies. Rockbaff, C. C.; Moore, W. A.; and Middleton, F. M. *Proc. Inservice Training Course in Water Works Problems*, Univ. Michigan School of Public Health, 1951.

(26) Determination of quartz in presence of silicates using phosphoric acid. Telytche, N. A. *Anal. Chem.* 23: 623, 1951.

(27) Microdetermination of chromium in blood. Chubbman, H. J., and Olsen, R. *Anal. Chem.* 24: 1341, 1952.

(28) Microdetermination of chromium with diphenylpicrylhydrazide by permanganate oxidation. Sullivan, B. R. *Anal. Chem.* 24: 1016, 1952.

Organic

(29) Bromide content of fruits and vegetables following fumigation with methyl bromide. Dudley, H. C. *Indust. & Eng. Chem., Anal. Ed.* 11: 259, 1939.

(30) The analysis of toluene for benzene by an ultraviolet absorption of vapor mixtures, and the determination of concentration of toluene in air by use of the Rayleigh-Jeans interference refractometer. Cole, P. A., and Armstrong, D. W. *J. Optic. Soc. Am.* 31: 746, 1941. *Abst., J. Indust. Hyg. & Toxicol.* 24: 125a, 1942.

(31) An analysis of atmospheric samples of explosive chemicals. Goldmann, P. H. *J. Indust. Hyg. & Toxicol.* 24: 121, 1942.

(32) Toxicology of acrylonitrile (vinyl cyanide). 3. Determination of thiocyanates in blood and urine. Lawton, A. H.; Sweeney, T. R.; and Dudley, H. C. *J. Indust. Hyg. & Toxicol.* 25: 13, 1943.

(33) Collection and estimation of traces of formaldehyde in air. Goldmann, P. H.,

and Yaboda, H. *Indust. & Eng. Chem. Anal. Ed.* 15: 377, 1943. *Abst., J. Indust. Hyg. & Toxicol.* 25: 102a, 1943.

(34) Determination of monomethyl ether of ethylene glycol. Werner, H. W., as Mitchell, J. L. *Indust. & Eng. Chem. Anal. Ed.* 15: 378, 1943. *Abst., J. Indust. Hyg. & Toxicol.* 25: 102b, 1943.

(35) Determination of the concentration of benzene and toluene in air by a gas-liquid chromatographic method. Cole, P. A. *J. Optic. Soc. Am.* 32: 304, 1942. *Abst., J. Indust. Hyg. & Toxicol.* 25: 71a, 1943.

(36) Photometric determination of benzene, toluene, and their ultra-derivative. Rucenstein, H. D. *Indust. & Eng. Chem. Anal.* 23, 15: 251, 1943. *Abst., J. Indust. Hyg. & Toxicol.* 25: 198a, 1943.

(37) The determination of halogenated hydrocarbons in the atmosphere. Goldman, P. H., and Seegmiller, C. G. *Indust. Hyg. & Toxicol.* 25: 181, 1943.

(38) A modification of the allen g method for the determination of atmospheric organic solvent vapors. Gralle, L. V.; Shen, T. W.; and Crabtree, L. J. *Indust. Hyg. & Toxicol.* 25: 172, 1944.

(39) Determination of volatile halogenated hydrocarbons in blood. Murph, H. J. *Indust. Hyg. & Toxicol.* 25: 243, 1944.

(40) Analysis of atmospheric carbonic acids containing nitrate groupings. Yaboda, H., and Goldmann, P. H. *J. Indust. Hyg. & Toxicol.* 25: 140, 1943.

(41) The estimation of volatile amount of tetryl in the atmosphere. Goldmann, P. H., and Rushing, I. M. *J. Indust. Hyg. & Toxicol.* 25: 105, 1943.

(42) Diethylaminomethanol as a reagent for the detection and colorimetric determination of small amounts of triethylamine in air. Goldmann, P. H., as Rushing, I. M. *J. Indust. Hyg. & Toxicol.* 25: 101, 1943.

(43) Determination of concentration of monomethyl ethylene glycol ethers in air by infra-red absorption spectroscopy. Kivimaki, C. Z.; Hruschka, F. H.; as Werner, H. W. *J. Indust. Hyg. & Toxicol.* 26: 103, 1944.

(44) A rapid spectrophotometric method for the determination of methemoglobin and carboxyhemoglobin in blood. Hoescker, R. L., and Brackett, F. S. *J. Biol. Chem.* 152: 683, 1944.

(45) Determination of aliphatic nitrate esters: A colorimetric method. Yaboda, H. *Indust. & Eng. Chem., Anal.* 15, 15: 27, 1943. *Pub. Health Bull. No. 282*, U. S. Public Health Service, 1944. P. 2. *Abst., J. Indust. Hyg. & Toxicol.* 25: 72a, 1943.

(46) Note on a new color reaction of chloroacetylchloroarsine. Minson, H. S. *J. Am. Chem. Soc.* 67: 2267, 1945.

(47) The determination of catechol, phenol, and hydroquinone in urine. Baerwald, H. D. *J. Biol. Chem.* 161: 685, 1945.

(48) The oxidation of hydroquinone by ascorbic acid in the presence of pyridine. Baerwald, H. D. *J. Am. Chem. Soc.* 67: 1437, 1945.

(49) The specificity of the xanthodipyridine reaction for 2,2 bis (p-chlorophenyl)-1,1,1-trichloroethane (DDT). Irreverre, P., and Shnitke, N. *Science* 102: 364, 1945.

(50) Composition of some trade name solvents used for cleaning and degreasing and for thinning paints. Brandt, A. D.; McConnell, W. J.; and Pitt, R. B. *Pub. Health Rep.* 61: 132, 1946. Reprint No. 2691.

(51) A primary standard for the colorimetric determination of hemoglobin. Horvack, R. L. *J. Lab. & Clin. Med.* 31: 580, 1946.

(52) The quantitative chromatography of silk hydrolyzate. Tolson, A.; Mosley, V. M.; and Wyckoff, R. W. G. *Science* 105: 604, 1947.

(53) An improved method for the determination of volatile hydrogenated hydrocarbons in blood and other biological materials. Alford, W. G. *J. Indust. Hyg. & Toxicol.* 29: 306, 1947.

(54) A micro-technique for identification of organic compounds using isotopic indicators and paper chromatography. Fiedler, S. *Abst., Federation Proc.* 9: 240, 1950.

(55) Determination of sodium and copper picosulfonates in dilute aqueous solutions. Haskins, W. T. *Pub. Health Rep.* 66: 1047, 1951. Reprint No. 3104.

BIOCHEMISTRY

(56) Solubility of carbon monoxide in serum and plasma. O'Brien, H. R., and Parker, W. L. *J. Biol. Chem.* 59: 289, 1922.

(57) The solubility of lead arsenate in body fluids. Fairhall, L. T. *Pub. Health Rep.* 54: 1830, 1939. Reprint No. 2067. O. p.

(58) The effect of lead acetate on oxygen uptake of rat liver slices. Baerwald, H. D., and Grand, J. A. *J. Biol. Chem.* 140: 285, 1941.

(59) Electrophoretic patterns, sedimentation pressure, and viscosity of serum denatured by ultraviolet radiation. Davis, R. D.; Hallander, A.; and Greenstein, J. P. *J. Biol. Chem.* 146: 655, 1942.

(60) Effect of lead absorption on blood calcium. Jennette, W. V., and Fairhall, L. T. *Pub. Health Rep.* 58: 1061, 1943. Reprint No. 2106. *Abst. J. Indust. Hyg. & Toxicol.* 25: 212b, 1943.

(61) The binding of sulfonamide drugs by plasma proteins. A factor in determining the distribution of drugs in the body. Davis, R. D. *J. Clin. Investigation*, 22: 753, 1943.

(62) The cytochrome c-haem complex. Horvack, R. L., and Kornberg, A. *J. Biol. Chem.* 165: 31, 1946.

(63) Hemoglobin crystals, casts and globules in the renal tubes of guinea pigs following chemical bronchitis. Pann, R. C., and Webster, S. H. *Am. J. Path.* 23: 967, 1947. *Abst. J. Indust. Hyg. & Toxicol.* 30: 82, 1948.

(64) Effect of the injection of various substances upon the *in vivo* electrical resistance of rats. Kahler, H., and Hochmann, G. *J. Nat. Cancer Inst.* 8: 103, 1948.

(65) Crystalline brain solutions as permanent standards for hemoglobin estimation. Horvack, R. L. *J. Lab. Clin. Med.* 32: 783, 1948.

(66) Effect of para-nitrobenzoic acid on the *in vivo* oxidation of hemoglobin. Spher, S. S. *J. Indust. Hyg. & Toxicol.* 31: 391, 1950.

(67) Determination of paracetamol in urine by partition poisoning cases. Mountain, J. T.; Stokow, H.; and O'Connor, G. T. *Indust. Health Monthly* 11: 88, June 1951.

MINERALOGY

(68) An accurate method for the determination of the components of a heterogeneous particulate mineral system. Goldman, F. H., and Balducci, J. M. *Am. Mineralogist* 24: 40, 1939.

(69) Full field view of interference figures. Goldman, F. H. *Am. Mineralogist* 27: 403, 1912.

(70) The localization of silver and copper sulphide minerals in polished sections by the potassium cyanide etch pattern. Yagoda, H. *Am. Mineralogist* 30: 51, 1945.

(71) The localization of uranium and thorium minerals in polished section. Part I. The alpha ray emission pattern. Yagoda, H. *Am. Mineralogist* 31: 87, 1946.

(72) Luminescent phenomena as aids in the localization of minerals in polished sections. Yagoda, H. *Economic Geology* 41: 813, 1946.

(73) Radioactive aggregates in uranium minerals. Yagoda, H. *Am. Mineralogist* 31: 402, 1946.

(74) Electron micrographs of molecules on the face of a crystal. Price, W. C., and Wyckoff, R. W. G. *Nature* 157: 704, 1946.

PHYSICAL APPARATUS AND INSTRUMENTATION

(75) A first recording spectrophotometer. Kuper, J. B. H., and Brackett, F. S. *Bull. Am. Physical Soc.* 15: No. 2, 11, 1949.

(76) Quartz double monochromator with single wavelength control. Brackett, F. S.; Wauson, H. T., and Kuper, J. B. H. *Bull. Am. Physical Soc.* 15: No. 2, 11, 1949.

(77) Technical requirements in the determination of absorption spectra by the ultraviolet microscope. Cole, P. A., and Brackett, F. S. *Rev. Scient. Instruments* 11: 419, 1940.

(78) An integrating photoelectric meter. Kuper, J. B. H.; Brackett, F. S.; and Richer, M. *Rev. Scient. Instruments* 12: 57, 1941.

(79) An aid in the dithionite method: A mechanical shaker for separatory funnel. Crisp, L. R., and Webster, S. H. *J. Lab. & Clin. Med.* 27: 239, 1941.

(80) A graphical interpretation of X-ray diffraction data using polar coordinates. White, W. C. *Am. Mineralogist* 28: 59, 1943.

(81) A simplified photoelectric colorimeter for blood analysis. Andrews, H. L., and Horvath, R. L. *Rev. Scient. Instruments* 16: 118, 1945.

(82) The use of the polarograph in the industrial hygiene laboratory. Goldmann, F. H., and May, I. *Am. Indust. Hyg. A. Quart.* 7: 21, 1946.

(83) Frozen-dried preparations for the electron microscope. Wyckoff, R. W. G. *Science* 104: 30, 1943.

(84) Electron microscopy of the virus of influenza. Massey, V. M., and Wyckoff, R. W. G. *Nature* 157: 293, 1946.

(85) The electron microscopy of plant virus-antibody mixtures. Black, L. M.; Price, W. C.; and Wyckoff, R. W. G. *Proc. Soc. Exper. Biol. & Med.* 61: 9, 1946.

(86) Electron micrographs of bacterial cultures infected with bacteriophage. Edwards, O. P., and Wyckoff, R. W. G. *Proc. Soc. Exper. Biol. & Med.* 61: 16, 1947.

(87) Electron micrographs from concentrated solutions of the tobacco mosaic virus protein. Wyckoff, R. W. G. *Internat. J. Biochem. & Biophysics* 1: 143, 1947.

(88) Photomicrography of moving objects by electronic photoflash technique. Webster, S. H.; Lillegren, R. J.; and Zanner, D. J. *J. Biol. Photographic Assoc.* 16: 90, 1948.

(89) *Electron Microscopy*. Wyckoff, R. W. G. Interscience Publishers, Inc., New York, 1949.

(90) The contributions of physicochemical methods to the solution of industrial hygiene problems. Stokinger, H. E. *Occup. Health* 12: 38, 1952.

(91) Flame spectrophotometry. Byers, B. H. *Occup. Health* 12: 194, 1952.

(92) The suppression of cyanogen bands in the direct current graphite arc by nitrogen chloride. Keenan, R. G. Thesis, University of Maryland, June 1952. *Anal. Chem.* (with C. E. White) 25: 887, 1953.

(93) Shaking machine rack for separatory funnels. Saltzman, H. E. *Occup. Health* 12: 148, 1952.

(94) The role of the emission spectrograph in occupational health investigations. Keenan, R. G. *Occup. Health* 13: 2, 1953.

PHYSICAL CHEMISTRY

(95) An improved technique for the spectrographic analysis of blood samples by the graphite arc method. Goldmann, F. H., and Armstrong, D. W. *Pub. Health Rep.* 51: 1261, 1939.

(96) Surface area in packed columns. DellaValle, J. M. *Chem. & Met. Eng.* 45: 688, 1938.

(97) Absorption and fluorescence spectra in relation to the photochemical action of methylcholanthrene on yeast. Hollander, A.; Cole, P. A.; and Brackett, F. S. *Am. J. Cancer* 37: 265, 1939.

(98) Absorption and fluorescence spectra in relation to the photochemical action of methylcholanthrene on yeast. Hollander, A., and Cole, P. A. *Physical Rev.* 55: 597, 1939.

(99) Spectroscopic analysis of biological fluids for heavy metals. Armstrong, D. W., and Brackett, F. S. *J. Ind. Hyg. & Toxicol.* 21: 448, 1939.

Absorption spectra of microscopic ureas. (eds. P. A. and Brackett, Bull. Am. Physical Soc. 15: No. 2, 40).

The absorption spectra of hemocyanin and its derivatives in the visible near infrared regions. Horvick, J. Biol. Chem. 148: 173, 1943.

Some recent developments in the use of electron microscopy. Wyckoff, G. Science 101: 21, 1946.

DENTISTRY

Statistical methods in dentistry. For. W. M. Chapter 23, Dental Statistics and Dental Art. S. M. Gordon, ed. & Fehlgar, Philadelphia, 1938.

Dental status of adult male mine smelter workers. Brinton, H. P.; seo, D. C.; and Thompson, E. O. Health Rep. 57: 218, 1932. Reprint 355. O. p. Abat, J. Indust. Hyg. & vol. 24: 108a, 1942.

The measurement and comparison of dental caries experience. Gafner, W. F. Dent. Research 21: 443, 1942.

Dental programs in war industries. Heacock, L. D. Dental Health 2: 3, 1943.

Dental services. Heacock, L. D. ed. 6, Manual of Industrial Hygiene Medical Service in War Industries. I. Gafner, ed. W. B. Saunders Co., Philadelphia, 1943.

Industrial dentistry vs. dentistry in industrial workers. Heacock, L. D. Dental Health 2: 5, 1943.

The place of dentistry in industrial health programs. Heacock, L. D. Ind. Med. 12: 672, 1943.

Dentistry's place in industrial health service. Heacock, L. D. Harvard Health Alumni Bull. 1: 48, 1944.

Industrial dental health. Heacock, L. D. Dentistry—A digest of practice 6: 3945.

Industrial dentistry. Heacock, L. D. Indiana M. A. 38: 381, 1945.

Dental programs for Indiana industries. Heacock, L. D. Monthly Bull. Indiana State Bd. of Health 48: 243, 1945.

Industrial dentistry as a career. Heacock, L. D. J. Am. Dent. A. 38: 57, 1945.

(103) Determination of cobalt in atmospheric samples. Keenan, R. G., and Flick, R. M. Anal. Chem. 20: 1238, 1948.

(104) Physicochemical studies of reversible and irreversible complexes of cobalt, histidine, and molecular oxygen. Haron, J. Z.; Bark, D.; and Schade, A. L. J. Nat. Cancer Inst. 9: 337, 1949.

(105) Rapid analytical method for air-pollution surveys. Keenan, R. G., and Myers, D. H. Arch. Indust. Hyg. & Occup. Med. 6: 220, 1952.

(118) Prevention of oral diseases of occupational origin. Heacock, L. D. Indust. Med. 15: 184, 1946.

(119) Dental relations in industrial health services. Heacock, L. D. Indust. Med. 16: 5, 1947.

(120) Industrial oral health. Forney, V. J. 1. Bradication of oral agents. Indust. Hyg. Newsletter 7: 5, Sept. 1947; 2. Adequate records. Ibid. 7: 3, Dec. 1947; 3. Oral examination for every employee. Ibid. 8: 13, Jan. 1948.

(121) Role of the dentist in oral cancer detection. Lloyd, H. S. Pub. Health Rep. 63: 205, 1948. Reprint No. 2869.

(122) Industrial dental care. A bibliography. Division of Industrial Hygiene, Public Health Service, 1950. Processed.

(123) Industrial dental programs. Walters, F. J. Pub. Health Nursing 42: 614, 1950.

(124) Comparison of two screening methods for determining caries experience among a group of industrial workers. Walters, F. J. Indust. Health Monthly 11: 63, May 1951.

(125) Oral manifestations of occupational origin. An annotated bibliography. Walters, F. J.; Fitch, J. W.; Nelson, R. L.; and Treat, J. W. Public Health Bibliography Series No. 7 (Public Health Service Pub. No. 225), 1952.

(126) Dental status of veterans and non-veterans in foundries. Walters, F. J., and Reisten, H. P. J. Am. Dental Assoc. 44: 40, 1952.

(127) Public health in industrial dentistry. Forsyth, R. D.; Phair, W. P.; Robinson, J. R.; and Aston, B. R. Pub. Health Rep. 67: 690, 1952. Reprint No. 3137.

(748) An evaluation of a chest X-ray survey of an industrial plant. Kramer, M.; Gundersen, G. W.; and Stockton, J. B. P. H. Health Rep. 61: 286, 1946.

(749) The industrial efficiency of the X-ray methods used in the detection of tuberculosis. Morgan, R. H.; Hillblom, H. E.; and Leary, J. Pub. Health Rep. 62: 260, 1947.

(750) Group chest X-ray examinations and the tuberculosis death rate. Harrison, P. Pub. Health Rep. 67: 762, 1942.

Venereal disease

(751) Syphilis in a large industrial community. Gubmann, G. H. Ven. Dis. 16: 227, 1940. Reprint No. 35. O.p.

(752) Syphilis control in industry. Sayers, R. R. Pub. Health Rep. Suppl. No. 119. 1938. O.p. Am. J. Pub. Health 28: 175. 1938.

(753) The control of syphilis in industry. Russell, A. E. J. Social Hyg. 24: 86, 1937.

(754) Industrial disease and the control of syphilis. Jones, R. R. West Virginia M. J. 31: 162, 1938.

(755) Syphilis and the workers. Sayers, R. R. Indust. Med. 7: 1, 1938.

(756) Syphilis control and its relation to the food industry. Russell, A. E. Ann. 25th Nat. Safety Congress 1: 321, 1939.

(757) Syphilis and the industrial worker. Russell, A. E. Proc. 28th Annual Meeting Medical Section American Life Convention, Asheville, N. C., 1938. U. S. Government Printing Office, Washington 1939.

(758) Syphilis case finding in industry. Russell, A. E. J. A. M. A. 114: 1321, 1940. A correction from author. Ibid. 115: 256, 1940.

(759) Syphilis control with special reference to railway employees. Russell, A. E. Indust. Med. 9: 32, 1940.

(760) Recommendations to State and local health departments for venereal disease control programs in industry. Report of Advisory Committee on Control of Venereal Diseases in Industry to U. S. Public Health Service. O. L. Anderson, chairman. J. A. M. A. 129: 828, 1947. Indust. Med. 11: 507, 1942.

(761) Venereal disease control in industry. Anderson, O. L. Chapter 24, Text Principles and Practice of Industrial Medicine, F. J. Wampler, ed. Williams & Wilkins Co., Baltimore, 1948. Chapter 15, Item 414, this Bibliography.

(762) Syphilis in industry: its relationship to industrial dermatoses. Schwartz, L., and Merkel, J. Dis. & Cutan. Rev. 6: 281, 1942. Abstr. J. Indust. Hyg. & Toxicol. 25: 256, 1943.

(763) The control of venereal disease among industrial workers. Anderson, O. L. Ann. J. Syph., Chaner. & Ven. Dis. 27: 412, 1943. Abstr. J. Indust. Hyg. & Toxicol. 25: 1066, 1943.

(764) Venereal disease control in industry. Gustberg, H. T. Indust. Med. 14: 232, 1945.

(765) Industrial hygiene and venereal disease control. Townsend, J. G., and Heller, J. R., Jr. Bull. Ven. Dis., Boston 19: 1, Apr. 1947.

Other communicable diseases

(766) Hookworm disease in three cotton mills in North Carolina. Stiles, C. W. Pub. Health Rep. 25: 434, 1910.

(767) Railroad malaria surveys 1922, Missouri Pacific Railroad. Fuchs, A. W. Pub. Health Bull. No. 135, U. S. Public Health Service, 1928. O.p.

(768) Malaria among Mexican cotton pickers imported into Mississippi. Barker, M. A., and Congle, C. P. Pub. Health Rep. 42: 1308, 1927. Reprint No. 1159. O.p.

(769) Respiratory diseases in a Portland cement plant. Thompson, L. R., and Brandage, D. K. J. Indust. Hyg. 11: 266, 1929.

(790) The pneumonic problem in the steel industry. Brundage, D. K., and Bloomfield, J. J. *J. Indust. Hyg.* 14: 346, 1932.

(791) Occupational and respiratory disease. Russell, A. E. *Sent. M. J.* 25: 619, 1932.

(792) Medical control of respiratory diseases. Drossen, W. C. Chapter 12, *Manual of Industrial Hygiene and Medical Service in War Industries*. W. M. Gafner, ed. W. B. Saunders Co., Philadelphia, 1943.

(793) Q fever in laundry workers, presumably transmitted from contaminated clothing. Oliphant, M. B.; Gordon, P. A.; Mels, A.; and Parker, R. R. *Am. J. Hyg.* 49: 79, 1919.

DUST DISEASES

Pneumoconiosis

(794) The dust hazard in the abrasive industry. Winslow, C.-E. A.; Greenberg, L.; and Greenberg, D. *Pub. Health Rep.* 34: 4171, 1919. Reprint No. 530. O.p.

(795) A study of the dust hazard in the wet and dry grinding shops of an ax factory. Winslow, C.-E. A., and Greenberg, L. *Pub. Health Rep.* 35: 2393, 1920. Reprint No. 610. O.p.

(796) Industrial pneumoconiosis. Thompson, L. R. *In* *McLaur Lecture*, 1927-1928, Johns Hopkins University, School of Hygiene and Public Health, Williams and Wilkins Company, Baltimore, 1928.

(797) The health of workers in dusty trades. 1. Health of workers in a Portland cement plant. Thompson, L. R.; Brundage, D. K.; Russell, A. E.; and Bloomfield, J. J. *Pub. Health Bull.* No. 170, U. S. Public Health Service, 1928. O.p. Abst., *Pub. Health Rep.* 43: 1437, 1928.

(798) A study of exposure to calcium dusts generated in the manufacture of Portland cement. Thompson, L. R., and Brundage, D. K. *J. Indust. Hyg.* 11: 482, 1929.

(799) The health of workers in dusty trades. General statement and summary of findings. Thompson, L. R.; Russell, A. E.; and Bloomfield, J. J. 3. Exposure to dust in coal mining. Brundage, D. K., and Frazer, B. S. (Section on pathology contributed by Gardner, L. U.) 4. Exposure to dust in a textile plant. Bloomfield, J. J., and Drossen, W. C. 5. Exposure to dusts of a silverware manufacturing plant. Goddard, J. C. 6. Exposure

to municipal dust (street cleaners in New York City). Britten, R. H. *Pub. Health Bull.* No. 208, U. S. Public Health Service, 1923. O.p. Abst., *Pub. Health Rep.* 18: 1908, 1923.

(800) Effect of cement dust upon workers. Russell, A. E. *Am. J. Med. Sc.* 185: 430, 1933.

(801) Effects of certain silicate dusts on the lungs. Drossen, W. C. *J. Indust. Hyg.* 15: 66, 1933.

(802) Pneumoconiosis. Report of two committees. Sayers, R. R., and Lamm, A. J., chairmen. *Am. Pub. Health Assoc. Year Book*, 1932-1933. Suppl. to *Am. J. Pub. Health* 23, No. 6, 1933. P. 600.

(803) Sand and metallic abrasive blasting as an industrial health hazard. Bloomfield, J. J., and Greenberg, L. *J. Indust. Hyg.* 15: 184, 1933.

(804) The health of workers in dusty trades. Sayers, R. R., and Bloomfield, J. J. *Illinois St. J.* 69: 421, 1934.

(805) Effect of inhaled marble dust as observed in Vermont marble balancers. Drossen, W. C. *Pub. Health Rep.* 49: 724, 1931. Reprint No. 1030. O.p.

(806) The effects of exposure to dust in two Georgia talc mills and mines. Drossen, W. C., and DattaValle, J. M. *Pub. Health Rep.* 59: 171, 1935. Reprint No. 1600. O.p.

(807) Pneumoconiosis. Report of committee. Sayers, R. R., chairman. *Am. Pub. Health Assoc. Year Book*, 1935-36. Suppl. to *Am. J. Pub. Health* 25, No. 3, 1935. P. 65.

(808) Pneumoconiosis among men and female workers. Drossen, W. C.; DattaValle, J. M.; Edwards, T. L.; Sayers, R. R.; Knott, H. F.; and Price, M. F. *Pub. Health Bull.* No. 259, U. S. Public Health Service, 1910. Abst., *Pub. Health Rep.* 35: 1459, 1910.

(809) The health of workers in dusty trades. 7. Health of a group of granite workers. Russell, A. E. *Pub. Health Bull.* No. 209, U. S. Public Health Service, 1911.

(810) Pneumoconiosis among men and female workers, a supplementary study. Vestal, T. F.; Whitwell, J. A.; and Joliet, P. V. *Indust. Med.* 12: 11, 1943. Abst., *J. Indust. Hyg. & Toxicol.* 25: 618, 1943.

(811) Pneumoconiosis in the United States. Drossen, W. C. *Proc. Ninth Internat. Congress Indust. Med.* July Wright & Sons, Bristol, England, 1911. P. 739.

Anthraco-silicosis

(812) Anthraco-silicosis (miners' asthma): Preliminary report of study made in anthracite region of Pennsylvania. Sayers, R. R.; Bloomfield, J. J.; DellaValle, J. M.; Jones, R. R.; Dreesen, W. C.; Brundage, D. K.; and Bridgen, R. H. Pa. Dept. Labor & Indust., Special Bull. No. 41, 1934.

(813) Anthraco-silicosis among hard coal miners. Sayers, R. R.; Bloomfield, J. J.; DellaValle, J. M.; Jones, R. R.; Dreesen, W. C.; Brundage, D. K.; and Batten, R. H. (With sections on autopsy material, by Miller, J. W., and on silica in the urine and in lung specimens, by Gehmann, F. H.) Pub. Health Bull. No. 221, U. S. Public Health Service, 1935. Op.

(814) Prevalence of anthraco-silicosis among hard-coal mining employees. Sayers, R. R., and Jones, R. R. Am. Inst. Mining & Met. Engrs., Tech. Pub. No. 634, 1935.

(815) Anthraco-silicosis. Dreesen, W. C., and Jones, R. R. J. A. M. A. 107: 1779, 1936.

(816) Anthraco-silicosis of anthracite miners. Sayers, R. R. Occupation and Health, Suppl. International Labour Office, Geneva, 1936.

(817) Research on siliceous dusts: Anthracite and clinical findings in hard coal miners. Sayers, R. R. Fourth Surgeon General's Symposium on Silicosis. P. J. Kildie, ed. Emporium Mutual Insurance Co., Wausau, Wis., 1936. P. 261.

(818) Pathogenesis of silicosis among hard-coal miners. Sayers, R. R. Silicosis: Proc. 1st Conf. on Silicosis, General, 1938. (Published by the Series F (Industrial Hygiene) of the International Labour Office, 1939. Appendix 3, p. 121.)

(819) Anthraco-silicosis among bituminous coal miners. Dunn, R. H.; Helfert, J. L.; and Prudden, H. P. Indust. Med., 1942. Vol. 3, J. Indust. Hyg. & Toxicol. 17: 72, 1941.

Asbestosis

(820) Effects of the inhalation of asbestos dust on the lungs of asbestos workers. Sayers, R. R.; McDonald, W. J.; and Thompson, L. H. Pub. Health Rep. No. 1, 1935. No. 1935. Op.

(821) Relationship of asbestosis and asbestosis disability. Sayers, R. R. Am. J. Association of Industrial Hygienists and Commissioners, 1935. 1935. Labor, Division of Labor

Standards, Bull. No. 4, 1935. Med. 5: 459, 1936.

(822) A study of asbestosis in the textile industry. Dreesen, DellaValle, J. M.; Edwards, T. L.; J. W.; and Sayers, R. R., with the aid of Ensom, H. F., and Trice. Pub. Health Bull. No. 241, U. S. Health Service, 1938. Op. Abst. Health Rep. 63: 1870, 1938.

(823) Asbestosis. Sayers, R. R. Dreesen, W. C. Am. J. Pub. Health 29: 208, 1939.

Silicosis

(824) Miners' consumption: A study of 438 cases of the disease among miners in southwestern Missouri. Lanza, A. J. With a chapter on roentgen findings in miners' consumption. Childs, S. R. Pub. Health Bull. 1 U. S. Public Health Service, 1937.

(825) Siliceous dust in relation to miners' disease among miners in Joplin district, Missouri. Higgin Lanza, A. J.; Lancy, F. B.; and G. S. Bur. Mines, Bull. No. 132, Op.

(826) Miner's consumption in the State of Idaho, Montana. Preliminary report of an investigation made in the 1936-1938. Harrington, D., and L. A. J. Bur. Mines, Tech. Paper 209, Op.

(827) Silicosis among miners. Sayers, R. R. Bur. Mines, Tech. Paper 372, Op.

(828) The effects of silica dust upon lungs. Sayers, R. R. Am. J. Pub. Health 17: 308, 348, 1927.

(829) The health of workers in a granite industry. 2. Exposure to siliceous dusts (granite industry). Russell, A. R.; Jones, R. H.; Thompson, L. H.; and Helfert, J. J. (With sections on autopsy material by Gardner, L. D. and on sputum by Knapp, A.) Pub. Health Bull. 187, U. S. Public Health Service, 1 Op. Abst., Pub. Health Rep. 41: 1 1929.

(830) Stages of silicosis. Report of committee, 1928. Sayers, R. R., chairman. Am. J. Pub. Health 19: 635, 1929.

(831) Effect of dust on the lungs. Report of committee, 1929. Sayers, R. R., chairman. Am. J. Pub. Health 20: 368, 1930.

(928) A new counting device for the counting of ultrashort. Brecher, G., and Hoffmann, R. *Am. J. Clin. Path.* 29: 78, 1950.

(929) Manual of safe practices. Precautions against hazards at the National Institutes of Health. National Institutes of Health, Public Health Service, Bethesda, Md., 1951. Processed.

(930) The evaluation of laboratory tests. Miller, S. E. *Chicago Med. Soc. Bull.* 53: 987, 1951.

(931) A Textbook of Clinical Pathology. S. E. Miller, ed. Williams & Wilkins

Co., Baltimore, 1952. Fourth ed. Chapters by editor: Ch. 8, Liver function tests; Ch. 9, Renal function for Ch. 14, Blood parasites; Ch. 15, Intestinal parasites; feces; Ch. 20, Syphilis; Ch. 21, Cerebrospinal fluid; Ch. 22, Urine and seminal fluid; Ch. Sputum; and Ch. 24, Gastric and duodenal contents.

MINES, HEALTH AND SAFETY

(932) Pulmonary disease among mine in the Joplin district, Missouri, and relation to rock dust in the sub. Lanza, A. J., and Higgins, B. *Bur. Min. Tech. Paper* 168, 1918. O.p.

(933) How a miner can avoid some of serious diseases. Lanza, A. J., and Wh. J. H. *Bur. Mines, Miners' Circ.* 20, 10 O.p.

(934) Miners' safety and health almanac for 1919. Williams, R. C. *Bur. Min. Miners' Circ.* 24, 1918. O.p.

(935) Miners' safety and health almanac for 1920. Williams, R. C. *Bur. Min. Miners' Circ.* 29, 1919. O.p.

(936) Methods for the judging of air and control. Sayers, R. R. *Bur. Min. Rep. Invest.* 2130, 1929. O.p.

(937) The transportation of the injured. Sayers, R. R. *Nation's Health* 3: 56, 1921.

(938) Physiological effects due to use rescue apparatus. Sayers, R. R. *Co. Trade Bull.* 46: 384, 1921.

(939) Manual of first-aid instruction for miners. Hiltersford, G. H.; Knapp, A. P.; Lynett, W. A.; Bountree, W. S. and Shields, M. J. Revised by R. R. Sayers. *Bur. Mines*, 1921. O.p.

(940) Prevention of illness among miners. Sayers, R. R. *Bur. Mines, Rep. Invest.* 2110, 1929. O.p.

(941) Underground dressing stations. Some pointers on construction, location and equipment of first aid rooms in mining operations. Sayers, R. R. *Comp. Management* 18: No. 1, 60, 1922.

(942) The care of the injured miner. Sayers, R. R. *Nation's Health* 5: 203, 1923.

(943) Physiological effects in use of mine rescue apparatus and methods for detecting dangerous gases. In Mine Rescue Standards. *Bur. Mines, Tech. Paper* 134, 1923. P. 12. O.p.

(944) Morbidity studies as an aid in preventing illness among miners. Sayers, R. R. *Bur. Mines, Rep. Invest.* 2453, 1929. O.p.

MUNITION PLANTS, HEALTH PROBLEMS

(945) Health hazards in the mining industry. Sayers, R. R. Bur. Mines, Rep. Invest. 2690, 1924. O.p.

(946) Making the mine a safe place to work. Sayers, R. R. Nation's Health 7: 161, 215, 1925.

(947) Review of safety and health conditions in the mines at Butte. Rice, G. S., and Sayers, R. R. Bur. Mines, Bull. 257, 1925. O.p.

(948) Health hazards in the mining industry. Sayers, R. R. New Albany Med. Herald 34: 67, 1925.

(949) Physiological factors of mine ventilation. Sayers, R. R. Bur. Mines, Inform. Circ. 6089, 1928. O.p.

(950) Physiological factors of mine ventilation. Sayers, R. R. Bur. Mines, Inform. Circ. 6100, 1929. O.p.

(951) Effect of abnormal air conditions on mine workers. Sayers, R. R. Bur. Mines, Inform. Circ. 6245, 1930.

(952) Connection between physical condition and liability to accidents of metal miners. Sayers, R. R. Bur. Mines, Inform. Circ. 6367, 1930.

(953) Effect on workers of air conditions. Sayers, R. R. Bur. Mines, Inform. Circ. 6139, 1931. O.p.

(954) Physiological factors in mine ventilation in 1931. Sayers, R. R. Bur. Mines, Inform. Circ. 6045, 1932.

(955) Mortality of coal miners. Brandage, D. K. Pub. Health Bull. No. 210, U. S. Public Health Service, 1933. O.p. Abst., Pub. Health Rep. 48: 1430, 1933.

(956) Mines (hygiene in). Sayers, R. R. Occupation and Health. International Labor Office, Geneva, 1934. Vol. 2, p. 271.

(957) The working environment and the health of workers in Minnesota coal mines, non-ferrous metal mines, and non-ferrous metal smelters in Utah. Division of Industrial Hygiene, U. S. Public Health Service, and Utah State Board of Health, 1940.

(958) Soft coal mines health and working environment. Wilson, R. H.; Siefert, H. R.; Brinston, H. P.; Jones, J. L.; and Franke, R. W. Pub. Health Bull. No. 270, U. S. Public Health Service, 1941. Abst., Pub. Health Rep. 56: 2482, 1941.

(959) Health and working environment of non-ferrous metal mine workers. Dreesen, W. C.; Page, R. T.; Haugh, J. W.; Truska, V. M.; Jones, J. L.; and Franke, R. W. Pub. Health Bull. No. 277, U. S. Public Health Service, 1942. Summary, J. Indust. Hyg. & Toxicol. 23: 629, 1943. Abst., Pub. Health Rep. 57: 708, 1942.

(960) Control of diseases in establishments for the manufacture and loading of high explosives. Council of National Defense. Pub. Health Rep. 33: 1007, 1918, Reprint No. 475. O.p.

(961) Trinitrotoluene poisoning. Voegtlin, C.; Hooper, C. W.; and Johnson, J. M. Pub. Health Rep. 34: 1307, 1919. Reprint No. 531. O.p.

(962) A study of the munitions intoxications in France. Perkins, R. G. Pub. Health Rep. 34: 2315, 1919.

(963) Recommended medical services for munitions plants. Wilson, R. H. Indust. Med. 11: 438, 1942.

(964) Industrial health hazards and their control in a bomb loading plant. Siefert, H. R.; Oralley, L. J.; and Clayton, G. D. Indust. Med. 14: 76, 1945.

(965) A medical study of the effect of TNT on workers in a bomb and shell loading plant. Stevens, R. F.; Lawton, A. H.; Skoug, F.; Neal, P. A.; and von Oettingen, W. F. Report of fatal case of splenic aneurysm. Stamp, R. L.; Mooney, A. R.; and Stevens, R. F. Pub. Health Bull. No. 291, U. S. Public Health Service, 1945.

(966) The occurrence of Helix bodies in trinitrotoluene workers. Horsteker, H. L. J. Indust. Hyg. & Toxicol. 27: 89, 1945.

(967) Occupational diseases in government-owned ordnance explosives plants. Observations on their prevalence and control during World War II. McConnell, W. J.; Egan, R. H.; and Brandt, A. D. Occup. Med. 1: 531, 1946.

(968) Aplastic anemia following exposure to trinitrotoluene. Report of three cases. Stevens, R. F.; Stamp, R. L.; and Mooney, A. R. Occup. Med. 1: 351, 1946.

(969) An evaluation of neurologic symptoms and findings occurring among TNT workers. Stevens, R. F. Pub. Health Rep. Supp. No. 190, 1947.

OPHTHALMOLOGY

(970) Trachoma in steel mill workers. Schereschewsky, J. W. Pub. Health Rep. 20: 500, 1914.

(971) Color blindness: Its relation to other ocular conditions, and the bearing on public health of tests for color acuity. Collins, G. L. Pub. Health 62n, 1943. Abst., Pub. Health Rep. 57: 798, 1942.

(972) Variation in eyesight at different ages, as determined by the Snellen test. Collins, S. D., and Britten, R. H. *Pub. Health Rep.* 30: 3189, 1924. Reprint No. 970. O.p.

(973) Measurements for Jaeger's test types used in near vision tests. *Pub. Health Rep.* 46: 518, 1931. Reprint No. 1455. O.p.

(974) The social significance of better sight. Ives, J. E. *Sight-Saving Rev.* 5: 119, 1935. *Appliance News* 6: No. 3, 26, 1935.

(975) Importance of industrial ophthalmology. Townsend, J. G. *Sight-Saving Rev.* 13: 219, 1943.

(976) Distribution of myopia in the corneal epithelium of the rabbit and rat. Kaufmann, R.; Gay, H.; and Holbender, A. *Ann. Ocul.* 56: 161, Oct. 1944.

(977) Right eyes for the right job. Raven, A. L. 1. Testing vision in industry. *Indust Hyg. Newsletter* 7: 4, April 1947; 2. Job analysis for visual requirements. *Ibid.* 7: 12, May 1947; 3. Care of the eyes by the industrial nurse. *Ibid.* 7: 5, July 1947.

(978) Conservation of vision. *Public Health Service Pub. No. 3*, 1929.

(979) Harmful effects of light on the eyes. 1. Koven, A. L. *Occup. Health* 12: 167, 1952; 2. *Ibid.* 12: 182, 1952.

PHYSICAL STATUS

Physical examination

(980) Industrial insurance. Medical examination of employees and prevention of sickness, its proper foundation. Schereschewsky, J. W. *Pub. Health Rep.* 20: 1417, 1911. Reprint No. 197. O.p.

(981) Physical examination of workers. Schereschewsky, J. W. *Pub. Health Rep.* 20: 1497, 1914. Reprint No. 234. O.p.

(982) Standards of measurement of ten thousand male workers: Preliminary note, with special reference to racial factors. Thompson, L. R., and Britten, R. H. *Am. J. Pub. Health* 14: 382, 1924.

(983) The physical examination as an instrument of research. Britten, R. H. *Pub. Health Rep.* 48: 1671, 1931. Reprint No. 1462. O.p. *Med. Officer* 46: 180, 1931.

(984) Mass screening techniques for chest disease. Industrial medical aspects. Derryberry, O. M. *J.A.M.A.* 161: 112, 1952.

(985) Studies of health hazards in industry. Health evaluation of the worker. Bloomfield, J. J. *Occup. Health* 12: 45, 1952.

Posture

(986) A résumé with comments, of the available literature relating to posture. Schwartz, L. *Pub. Health Rep.* 42: 1219, 1927. Reprint No. 1158. O.p.

(987) Studies in physical development and posture. 1. The effect of exercise on the physical condition and development of adolescent boys. 2. Bodily growth with age. 3. Physical fitness as reflected in tests of muscular strength. Schwartz, L.; Britten, R. H.; and Thompson, L. R. *Pub. Health Bull. No. 179*, U. S. Public Health Service, 1928. O.p. *Abst., Pub. Health Rep.* 48: 3429, 1928.

(988) Studies in physical development and posture. 4. Postural relations as noted in twenty-two hundred boys and men. Schwartz, L.; Britten, R. H.; and Thompson, L. R. *Pub. Health Bull. No. 190*, U. S. Public Health Service, 1931. O.p.

(989) Efficient posture in industry. Schwartz, L. *Neighborhood Health* 6: No. 6, 4, 1946.

Impairments

(990) Some physical characteristics of male garment-workers of the cloak and suit trades, based upon 2,197 physical examinations made in New York, N. Y. Schereschewsky, J. W. *Am. J. Pub. Health* 3: 593, 1915.

(991) A health study of ten thousand male industrial workers: Statistical analysis of surveys in ten industries. Britten, R. H., and Thompson, L. R. *Pub. Health Bull. No. 102*, U. S. Public Health Service, 1926. O.p.

(992) Physical impairments and occupational class. Differential rates based upon medical examinations of 109,924 native-born, adult white insured males. Sydenstricker, E., and Britten, R. H. *Pub. Health Rep.* 48: 1937, 1936. Reprint No. 1464. O.p.

(993) Physical impairments among males of different occupational classes. Division of Research, Milbank Memorial Fund. *Milbank Mem. Fund Quart.* 8: 67, 1930.

(994) The physical impairments of adult life. Prevalence at different ages, based on medical examinations by the Life Extension Institute of 109,924 white male life insurance policy holders since 1921. Sydenstricker, E., and Britten, R. H. *Am. J. Hyg.* 11: 95, 1930.

(1003) The physical impairments of adult life. General results of a statistical study of medical examinations by the Life Extension Institute of 100,024 white male life insurance policy holders since 1921. Sydenstricker, R., and Britten, R. H. *Am. J. Hyg.* 11: 73, 1929.

(1004) Sex differences in the physical impairments of adult life. A comparison of rates among men and women, based on 112,018 medical examinations by the Life Extension Institute. Britten, R. H. *Am. J. Hyg.* 13: 741, 1931.

(1005) Rates of physical impairments in 28 occupations, based on 17,204 medical examinations. Britten, R. H., and Goddard, J. C. *Pub. Health Rep.* 47: 1, 1932.

(1006) The physical impairments of adult life. Association with subsequent rates of mortality. Britten, R. H. *J. Preventive Med.* 6: 249, 1932.

(1007) Physical impairment and weight. A study of medical examination records of 3,037 men markedly under or over weight for height and age. Britten, R. H. *Pub. Health Rep.* 48: 920, 1933. Reprint No. 1638. O.p.

(1008) Health status of adults in the productive ages. Hollmann, D. E. *Pub. Health Rep.* 56: 2071, 1941. Reprint No. 2327.

(1009) The physically handicapped. Karpman, R. D. *Pub. Health Rep.* 58: 1573, 1943. Reprint No. 2521. O.p.

(1010) Maximum use of manpower. Fline, R. H. Chapter 22, *Manual of Industrial Hygiene and Medical Services in War Industries*. W. M. Gaffney, ed. W. B. Saunders Co., Philadelphia, 1943.

(1011) Statistical studies of heart diseases. I. Heart disease and allied causes of death in relation to age changes in the population. Moriyama, I. M., and Gayer, M. *Pub. Health Rep.* 63: 817, 1948.

(1012) Physical impairment of members of low-income farm families—11,490 persons in 2,477 rural families examined by the Farm Security Administration, 1940-7. Variation of blood pressure and heart disease with age; and the correlation of blood pressure with height and weight. Gayer, M. *Pub. Health Rep.* 63: 1283, 1948.

(1013) Chronic illness. Digests of selected references. Turner, V. B. *Public Health Bibliography Series No. 1* (Public Health Service Pub. No. 10), 1951.

(1014) Physical status of men examined through Selective Service in World War II. Goldstein, M. R. *Pub. Health Rep.* 66: 587, 1951. Reprint No. 3080.

(1015) Who's an amputee? Newberry, C. L. *Indust. Health Monthly* 11: 153, Oct., 1951.

(1016) What about jobs for people with heart disease? Van Slyke, C. J. *Sci. Heart Inst., Nat. Inst. Health*, 1952. Unrevised.

(1017) The control of chronic illness and efforts in rehabilitation. APHA Conference Report. *Pub. Health Rep.* 68: 84, 1953.

PRESSURE AND TEMPERATURE

Pressure

(1018) Possibilities in the use of helium-oxygen mixtures as a mitigation of caisson disease. Sayers, R. R.; Yant, W. P.; and Hildebrand, J. H. *Bur. Mines, Rep. Invest.* 2670, 1927.

(1019) The value of helium-oxygen atmosphere in diving and caisson operations. Sayers, R. R., and Yant, W. P. *Anesth. & Analg.* 5: 127, 1928.

(1020) Helium in deep diving and caisson working. Hildebrand, J. H.; Sayers, R. R.; and Yant, W. P. *Nature, London*, 121: 577, 1928.

(1021) Administration of pure oxygen to compressed air workers during decompression: Prevention of the occurrence of severe compressed air illness. Jones, R. R.; Gresson, J. W.; Grimm, P. E.; Sayers, R. R.; Schreck, H. H.; and Levy, R. J. *Indust. Hyg. & Toxicol.* 22: 427, 1941.

(1022) Helium-oxygen mixtures for alleviation of tired and sinus block in compressed air workers. Gresson, J. W.; Jones, R. R.; and Sayers, R. R. *Pub. Health Rep.* 55: 1187, 1940. Reprint No. 2101.

(1023) A new apparatus for the adjusted fraction of helium-oxygen mixtures. Brubaker, H. P.; Griep, L. R.; and Neill, P. *Pub. Health Rep.* 55: 1770, 1940. Reprint No. 2197.

(1024) The role of the arterial cortex in man. The effect of repeated tidal exposures to reduced oxygen pressure. Thorn, G. W.; Jones, R. P.; Lewis, R.; Mitchell, R. R.; and Kopp, G. P. *A. J. Physiol.* 117: 905, 1932.

(1025) Recent progress in aviation and caisson. Jones, R. R. *Al. Clin. Nut. America* 20: 1303, 1942.

(1026) A course in aviation medicine for medical students. Jones, R. P. *J. A. Am. M. Colleges* 17: 137, 1942. *Abstr., J. Aeronaut. Med.* 13: 150, 1942.

(1619) Beneficial effects of estrogens on altitude tolerance of rats. Davis, E. D., and Jones, H. F. *Endocrinology* 33: 28, 1943.

(1620) Changes in adrenal glands of rats following exposure to lowered oxygen tension. Dutton, A. J.; Mitchell, E. R.; Jones, H. F.; and Peters, V. J. *Nat. Cancer Inst.* 4: 527, 1944.

(1621) A comparative study of eight tests in the decompression chamber. Malmo, R. H., and Fenn, J. L. *Am. J. Psychol.* 57: 349, 1944.

(1622) Pathologic changes in sheep resulting from exposure to low barometric pressures. Milner, J. W. *Pub. Health Rep.* 59: 618, 1944. Reprint No. 2556.

(1623) A comparative study of the effects of exercise and anoxia upon the human electrocardiogram. Baum, W. S.; Malmo, R. H.; and Sayers, R. P. *J. Aviation Med.* 36: 422, 1945.

(1624) Delayed acute sero-otitis media and methods of prevention. Bowen, W. J. *Nat. M. Bull.* 41: 247, 1943.

(1625) Physiological effects of abnormal atmospheric pressure. Specht, H. Chapter 6. *Industrial Hygiene and Toxicology*. E. A. Patty, ed. Interscience Publishers, Inc., New York, 1948. Vol. 1.

(1626) Effects of helium and altitude on respiratory flow patterns. Specht, H.; Marshall, E. H.; and Spickard, D. H. *J. Applied Physiol.* 2: 363, 1950.

(1627) Changes in renal function during hypoxia and adaptation to reduced barometric pressure. Marshall, E. H., and Specht, H. *Abst. Am. J. Physiol.* 163: 211, 1950.

Temperature

(1628) Health conservation at steel mills. Watkins, J. A. *Bar. Mines, Tech. Paper* 342, 1946. Op.

(1629) Physiological effect of high temperatures and high humidities in metal mines. Sayers, R. R., and Harrington, D. *Env. & Mus. J.* 110: 401, 1923.

(1630) A preliminary study of the physiological effects of high temperatures and high humidities in metal mines. Sayers, R. R., and Harrington, D. *Pub. Health Rep.* 55: 116, 1923. Reprint No. 693. Op.

(1631) The effects of high temperatures and humidities. Physiological basis of modern ventilation and present methods of research. McConnell, W. J. *Nation's Health* 1: 416, 1922.

(1632) Physiological effect of high temperatures and humidities with and without air movement. Sayers, R. R., and Harrington, D. *Bar. Mines, Rep. Invest.* 2464, 1923. Op.

(1633) Some physiological reactions to high temperatures and humidities. McConnell, W. J., and Houghton, P. C. *J. Am. Soc. Heating & Ventilating Engrs* 29: 131, 1923; *Trans. Am. Soc. Heating & Ventilating Engrs*, 29: 129, 1923.

(1634) Further study of physiological reactions. Practical application of data developed in laboratory tests on effect of various high temperatures and humidities in still air. McConnell, W. J.; Houghton, P. C.; and Phillips, F. M. *J. Am. Soc. Heating & Ventilating Engrs* 29: 507, 1923; *Trans. Am. Soc. Heating & Ventilating Engrs*, 29: 533, 1923.

(1635) Physiological effects on high temperatures and humidities with and without air movement. Effects on body temperature and pulse rate of subjects at rest. Sayers, R. R., and Harrington, D. *Pub. Health Rep.* 38: 1016, 1923. Reprint No. 854. Op.

(1636) Some effects on man of high temperatures. McConnell, W. J., and Sayers, R. R. *Bar. Mines, Rep. Invest.* 2584, 1924. Op.

(1637) Air motion—high temperatures and various humidities—reactions on human beings. McConnell, W. J.; Houghton, P. C., and Yagloglou, C. P. *J. Am. Soc. Heating & Ventilating Engrs* 30: 183, 1924; *Trans. Am. Soc. Heating & Ventilating Engrs* 30: 107, 1924.

(1638) Correlation of skin temperatures and physiological reactions. McConnell, W. J., and Yagloglou, C. P. *J. Am. Soc. Heating & Ventilating Engrs* 30: 457, 1924; *Trans. Am. Soc. Heating & Ventilating Engrs* 30: 305, 1924.

(1639) Work tests conducted in atmospheres of high temperatures and various humidities in still and moving air. McConnell, W. J., and Yagloglou, C. P. *J. Am. Soc. Heating & Ventilating Engrs* 31: 35, 1926; *Trans. Am. Soc. Heating & Ventilating Engrs* 31: 101, 1926.

(1640) Basal metabolism before and after exposure to high temperatures and various humidities. McConnell, W. J.; Yagloglou, C. P.; and Fulton, W. B. *Pub. Health Rep.* 30: 3976, 1924. Reprint No. 677. Op. *J. Am. Soc. Heating & Ventilating Engrs* 31: 53, 1925; *Trans. Am. Soc. Heating & Ventilating Engrs* 31: 123, 1925.

(1641) Some effects of high environmental temperatures on the organism. Pflum, F. B. *Pub. Health Rep.* 40: 968, 1925. Reprint No. 1006. Op.

(1042) Basal metabolism as affected by atmospheric conditions. McConnell, W. J., and Yagihara, C. P. Arch. Int. Med. 38: 582, 1935.

(1043) Review of literature on the physiological effects of abnormal temperatures and humidities. Sayers, R. R., and Davisport, S. J. Pub. Health Rep. 42: 103, 1927. Reprint No. 1159. O.p.

(1044) Tests of atmospheres in Chesapeake and Ohio railroad tunnels between Clifton Forge, Virginia; and Hinton, West Virginia. Sayers, R. R.; Berger, L. B.; and Yang, W. P. Bur. Mines, Rep. Invest. 2858, 1928. O.p.

(1045) Effect of radiant energy on the skin temperatures of a group of steel workers. Bloomfield, J. J.; Ives, J. R.; and Britten, R. H. Pub. Health Rep. 45: 697, 1930. Reprint No. 1379. O.p.

(1046) Frequency of pneumonia among iron and steel workers. Hurdage, D. K.; Russell, A. E.; Jones, R. R.; Bloomfield, J. J.; and Thompson, L. R. Pub. Health Bull. No. 202, U. S. Public Health Service, 1932. O.p.

(1047) Vasomotor reactions to localized drafts. Winslow, C. M. A., and Greenburg, L. Am. J. Hyg. 15: 1, 1932.

(1048) Tolerance of man toward hot atmospheres. Adolph, E. F. Pub. Health Rep. Supp. No. 162, 1940.

PROBLEMS OF AGING AND THE AGED

(1049) Influence of occupation on health during adolescence. Report of a physical examination of 679 male miners under 18 in the cotton industries of Massachusetts. Rufferd, M. V. Pub. Health Bull. No. 78, U. S. Public Health Service, 1916. O.p.

(1050) Age of gainful workers of the United States, 1920 and 1930. Studies on the age of gainful workers No. 1. Gafner, W. M. Pub. Health Rep. 62: 269, 1937. Reprint No. 1866. O.p.

(1051) Age of gainful male workers in different geographic regions of the United States, 1920 and 1930. Studies on the age of gainful workers No. 2. Gafner, W. M. Pub. Health Rep. 62: 437, 1937. Reprint No. 1813. O.p.

(1052) Age of gainful female workers in different geographic regions of the United States, 1920 and 1930. Studies on the age of gainful workers No. 3. Gafner, W. M. Pub. Health Rep. 62: 739, 1937. Reprint No. 1826. O.p.

- (1334) Radiation exposure in the United States. Neidler, D. W.; Tervill, J. G., Jr.; and Ingraham, S. C. *Pub. Health Rep.* 68: 57, 1953.

ULTRAVIOLET RADIATION

Biologic studies

- (1335) Monochromatic ultraviolet radiation as an activating agent for the eggs of *Arcebia punctulata*. Hollander, A. *Biol. Bull.* 75: 248, 1938.
- (1336) Parthenogenetic development of the eggs and egg fractions of *Arcebia punctulata* caused by monochromatic ultraviolet radiation. Harvey, E. B., and Hollander, A. *Biol. Bull.* 75: 238, 1938.
- (1337) The effects of sublethal doses of monochromatic ultraviolet radiation on the growth properties of bacteria. Hollander, A., and Daggan, H. M. *J. Bact.* 80: 17, 1953.
- (1338) The influence of monochromatic ultraviolet radiation on the rate of variant production in *Trichophyton mentagrophytes*. Eamons, C. W., and Hollander, A. *Genetics* 24: 79, 1939.
- (1339) The action of nitra violet radiation on dermatophytes. 1. The fungicidal effect of monochromatic ultraviolet radiation on the spores of *Trichophyton mentagrophytes*. Hollander, A., and Eamons, C. W. *J. Cell. & Comp. Physiol.* 1: 301, 1939.
- (1340) The action of ultraviolet radiation on dermatophytes. 2. Mutations induced in cultures of dermatophytes: exposure of spores to monochromatic ultraviolet radiation. Eamons, C. W., and Hollander, A. *Am. J. Botany* 2: 467, 1939.
- (1341) Fungicidal and sublethal effects of monochromatic ultraviolet radiation on the spores of dermatophytes. Hollander, A., and Eamons, C. W. *Genetics* 1: 75, 1939.
- (1342) The action of ultraviolet radiation on dermatophytes. 4. Effect on germination in certain chemical nutrient after exposure. Eamons, C. W., and Hollander, A. *Supp. to Am. J. Botany* No. 10, 1940. P. 15a.
- (1343) The effects of monochromatic ultraviolet radiation on eggs of the nematode *Enterobius vermicularis*. 1. Quantitative response. Hollander, A.; Jones, M. P.; and Jacobs, L. *J. Parasitol.* 29: 421, 1939.
- (1344) The effects of monochromatic ultraviolet radiation on eggs of the nematode, *Enterobius vermicularis*. 2. Sublethal effects. Jones, M. P.; Jacobs, L., and Hollander, A. *J. Parasitol.* 29: 435, 1940.
- (1345) The absorption of ultraviolet radiation by bands of the salivary gland chromosomes of *Drosophila melanogaster*. Cole, P. A., and Sutton, R. *Cold Spring Harbor Symposia on Quantitative Biology* 9: 65, 1941.
- (1346) The ultraviolet absorption spectra of different regions of *Trichophyton mentagrophytes* spores. Cole, P. A. *Am. J. Bot.* 28: 931, 1941.
- (1347) Wave length dependence of the production of mutations in fungous spores by monochromatic ultraviolet radiation (2180-2950 Å). Hollander, A. *Proc. Seventh International Genetical Congress*, 1939. R. C. Punnett, ed. Issued as supplementary volume of *Journal of Genetics*. University Press, Cambridge, 1941. P. 153.
- (1348) The absorption of ultraviolet radiation by the abdominal wall of *Drosophila melanogaster*. Durand, H.; Hollander, A.; and Hoshlman, M. B. *Genetics* 29: 149, 1941.

(1349) Ultraviolet absorption spectrum of the abdominal wall of *Drosophila melanogaster*. Durrell, B.; Hollaender, A.; and Houlahan, M. R. *J. Heredity* 32: 51, 1941.

(1350) The wave length dependence of genetical changes produced by ultraviolet radiation. Hollaender, A. *J. Wash. Acad. Sci.* 31: 376, 1941.

(1351) Effect of monochromatic ultraviolet radiation on *Drosophila melanogaster*. Demerec, M.; Hollaender, A.; Houlahan, M. B.; and Bishop, M. *Proc. Genet. Soc. Am.*, No. 10, 139, 1941. *Abst., Genetics* 27: 139, 1942.

(1352) Wave length dependence of mutation production in the ultraviolet with special emphasis on fungi. Hollaender, A., and Kinnison, C. W. *Cold Spring Harbor Symposium on Quantitative Biology* 9: 179, 1941.

(1353) The effect of long ultraviolet and near visible radiation on the eggs of the nematodes *Enterobius verossolaris* and *Ascaris lumbricoides*. Jones, M. P., and Hollaender, A. *Supp. to J. Parasitol.* 28, No. 9, 1942. P. 17.

(1354) Effect of long ultraviolet and short visible radiation (3500 to 4000 Å) on *Escherichia coli*. Hollaender, A. *J. Bact.* 49: 581, 1943.

(1355) Effect of ultraviolet and near visible radiation on the eggs of the nematodes *Enterobius verossolaris* and *Ascaris lumbricoides*. Jones, M. P., and Hollaender, A. *J. Parasitol.* 30: 26, 1944.

(1356) Immediate effects of low doses of ultraviolet radiation of wave length 2837 Å on mitosis in the grasshopper neuroblast. Carlson, J. G., and Hollaender, A. *J. Cell. & Comp. Physiol.* 23: 167, 1944.

(1357) Quantitative irradiation experiments with *Neurospora crassa*. 2. Ultraviolet irradiation. Hollaender, A.; Sainsome, B. Jr.; Zimmer, E.; and Demerec, M. *Ann. J. Botany* 32: 229, 1945.

(1358) The production and characterization of ultraviolet-induced mutations in *Aspergillus terreus*. 1. Production of the mutations. Hollaender, A.; Raper, K. B.; and Coghlin, R. D. *Ann. J. Botany* 32: 199, 1945. 2. Cultural and morphological characteristics of the mutations. *Ibid.* 32: 165, 1945.

(1359) Intensity effects of ultraviolet radiation of wave length 2837 Å on mitosis in the grasshopper neuroblast. Carlson, J. G., and Hollaender, A. *J. Cell. & Comp. Physiol.* 20: 103, 1945.

(1360) The mechanism of radiation effects and the use of radiation for the

production of mutations with improved fermentation. Hollaender, A. *Ann. Missouri Botanical Gardens* 32: 165, 1945.

(1361) Ultraviolet radiation as a means of sterilizing tissue culture materials. Carlson, J. G.; Hollaender, A.; and Gaudin, M. R. *Science* 103: 187, 1947.

Aerobiologic studies

(1362) Integrating meters for ultraviolet radiation. Kaper, J. B. H., and Bruckert, P. S. *Physical Rev.* 55: 1128A, 1939.

(1363) Astatic and sublethal effects of ultraviolet radiation on microorganisms. Hollaender, A. In *Aerobiology*, F. R. Moulton, ed. American Association for the Advancement of Science, Washington, 1942. P. 158.

(1364) Ultraviolet irradiation as a means of disinfection of air. Hollaender, A. *Am. J. Pub. Health* 33: 959, 1943. *Abst., J. Indust. Hyg. & Toxicol.* 25: 216a, 1943.

(1365) Control of air-borne micro-organisms by ultraviolet floor irradiation. Hollaender, A.; De Buy, H. G.; Jegenhann, H. S.; and Wheeler, S. M. *Science* 99: 130, 1944.

(1366) The inactivating effect of monochromatic ultraviolet radiation on influenza virus. Hollaender, A., and Oliphant, J. W. *J. Bact.* 48: 447, 1944.

(1367) The effect of monochromatic ultraviolet radiation on influenza virus as compared with other viruses. Hollaender, A., and Oliphant, J. W. *J. Bact.* 47: 471, 1944.

(1368) Effectiveness of ultraviolet irradiation of upper air for the control of bacterial air contamination in sleeping quarters. Schneider, R.; Hollaender, A.; Camasta, B. H.; Kolb, E. W.; Frass, H. P.; De Buy, H. G.; Neuf, P. A.; and Rosenberg, H. R. *Am. J. Hyg.* 40: 15, 1944.

(1369) Studies in connection with the selection of a satisfactory culture medium for bacterial air sampling. Schneider R.; Dunn, J. R.; and Camasta, B. *Hyg. Pub. Health Rep.* 90: 793, 1945. *Report No. 2637.*

(1370) An ultraviolet intensity meter & field use. Andrews, H. L. *Rev. Scient. Instruments* 19: 253, 1945.

(1371) Disinfection of air by ultraviolet irradiation. Hollaender, A. *Am. J. Pub. Health* 35: 843, 1945.

(1372) Ultraviolet light control of air

ter, Wheeler, S. M.; Ingraham, H. S.; Hollaender, A.; Lell, N. D.; Gershon-Cohen, J.; and Brown, E. W. *Am. J. Pub. Health* 35: 457, 1945.

(1373) Studies on the air transmission of micro-organisms derived from the respiratory tract. De Bay, H. G.; Arnold, F. A.; and Ochan, B. J. *Pub. Health Rep.* 62: 1394, 1947. Re-print No. 2809.

(1374) Studies of the control of acute respiratory diseases among naval recruits. 1. A review of a four-year experience with ultraviolet irradiation and dust suppressive measures, 1943-1947. Willmon, T. L., Hollaender, A.; and Langmuir, A. D. *Am. J. Hyg.* 48: 227, 1948. 2. Limitations of ultraviolet irradiation in reducing air-borne bacteria in

barracks with low ceilings. Jarrett, R. T.; Zella, M. R.; and Hollaender, A. *Ibid.* 48: 233, 1948. 3. The epidemiological pattern and the effect of ultraviolet irradiation during the winter of 1946-1947. Langmuir, A. D.; Jarrett, R. T.; and Hollaender, A. *Ibid.* 48: 249, 1948.

(1375) An evaluation of ultraviolet radiation of sleeping quarters as supplement of accepted methods of disease control. De Bay, H. G.; Dunn, J. R.; Bruckett, F. S.; Dreesen, W. C.; Nuss, P. A.; and L'essert, I. *Am. J. Hyg.* 48: 207, 1948.

(1376) Comments on use of chemical vapors and ultraviolet light for control of disease. Schuster, R. *Indust. Hyg. Newsletter* 10: 6 Nov. 1950.

STATE AND LOCAL SERVICES AND PERSONNEL

SERVICES

(1377) Need and method of coordinating Federal, State and local health agencies in promoting industrial hygiene. Scherckshewsky, J. W. *Am. J. Pub. Health* 9: 1037, 1917.

(1378) Relation of the Public Health Service to problems of industrial hygiene. Kerr, J. W. *Am. J. Pub. Health* 7: 769, 1917.

(1580) Health conditions among chemical workers with respect to earnings. Phillips, P. M., and Sager, G. A. Pub. Health Rep. 38: 2126, 1923. Reprint No. 879. O.p.

(1581) Disabling sickness in cotton mill communities of South Carolina in 1917. A study of sickness prevalence and absenteeism, as recorded in reported canvasses, in relation to seasonal variation, duration, sex, age, and family income. Wight, D., and Sydenstricker, E. Pub. Health Rep. 39: 1417, 1924. Reprint No. 929. O.p.

(1582) A study of the incidence of disabling sickness in a South Carolina cotton mill village in 1918. Sydenstricker, E., and Wight, D. Pub. Health Rep. 39: 1723, 1924. Reprint No. 938. O.p.

(1583) The income cycle in the life of the wage earner. Sydenstricker, E.; King, W. L.; and Wight, D. Pub. Health Rep. 39: 2138, 1924. Reprint No. 947. O.p.

(1584) Economic status and health. A review and study of the relevant morbidity and mortality data. Collins, S. D. Pub. Health Bull. No. 165, U. S. Public Health Service, 1926. O.p.

(1585) A study of endemic pellagra in some cotton-mill villages of South Carolina. Goldberger, J.; Wheeler, G. A.; Sydenstricker, E.; and King, W. L. Hyg. Lab. Bull. No. 153, U. S. Public Health Service, 1929. O.p. Abst., Pub. Health Rep. 43: 2645, 1928.

(1586) Sickness and the economic depression. Preliminary report on illness in families of wage earners in Birmingham, Detroit and Pittsburgh. Perrott, O. S. J.; Collins, S. D.; and Sydenstricker, E. Pub. Health Rep. 48: 1231, 1933. Reprint No. 1598. O.p.

(1587) Important causes of sickness and death. Reiten, R. H. Pub. Health Rep. 51: 947, 1936. Reprint No. 1769. O.p.

(1588) An investigation of low mortality in certain areas. Woolsey, T. D. Pub. Health Rep. 61: 909, 1946.

Sickness in various industries

(1589) Diseases prevalent among steel workers in a Pennsylvania city. Brundage, D. K. Pub. Health Rep. 35: 3163, 1920. Reprint No. 632. O.p.

(1590) Sickness and absenteeism during 1919 in a large industrial establishment. Brundage, D. K. Pub. Health Rep. 35: 2543, 1920. Reprint No. 611. O.p.

(1591) Sickness among New York State factory workers in 1919. Pub. Health Rep. 37: 2376, 1922.

(1592) Sickness among office workers. Brundage, D. K. Pub. Health Rep. 37: 627, 1922. Reprint No. 732. O.p.

(1593) Disabling sickness among employees of a rubber manufacturing establishment in 1918, 1919, and 1920. Pub. Health Rep. 37: 3082, 1922. Reprint No. 864. O.p.

(1594) Sickness among 21,000 automobile workers. Brundage, D. K. Pub. Health Rep. 39: 791, 1924. Reprint No. 914. O.p.

(1603) A 10-year record of absence from work on account of sickness and accidents, Edison Electric Illuminating Co. of Boston, 1915 to 1924, inclusive. Brundage, D. K. Pub. Health Rep. 42: 529, 1927. Reprint No. 1142. O.p.

(1595) Sickness among persons in different occupations of a public utility, Brundage, D. K. Pub. Health Rep. 43: 344, 1928. Reprint No. 1265. O.p.

(1597) Trend of disabling sickness among employees of a public utility, Brundage, D. K. Pub. Health Rep. 43: 1957, 1928. Reprint No. 1239. O.p.

(1598) Frequency and duration of disabilities causing absence from work among the employees of a public utility, 1925-1937. Gafner, W. M., and Prusker, E. S. Pub. Health Rep. 53: 1273, 1938. Reprint No. 1953.

(1599) Frequency of sickness and non-industrial accidents causing disability lasting 8 calendar days or longer among 60,000 white male railroad employees, 1930-34, inclusive. Gafner, W. M. Pub. Health Rep. 53: 535, 1938. Reprint No. 1924. O.p. Abst., Monthly Labor Rev. 48: 118, 1935.

(1600) Disabling sickness and nonindustrial injuries among drivers and other employees of certain bus and cab companies, 1930-34, inclusive. Brinton, H. P. Pub. Health Rep. 51: 359, 1936. Reprint No. 2040.

(1601) Disabling morbidity among employees in the soap industry, 1930-34, inclusive. Brinton, H. P., and Seifert, H. B. Pub. Health Rep. 51: 1304, 1936. Reprint No. 2003.

(1602) Disabling morbidity, and mortality among white and Negro male employees in the slaughter and meat packing industry, 1930-34, inclusive. Brinton, H. P. Pub. Health Rep. 51: 1305, 1936. Reprint No. 2111. O.p.

(1603) Disabling morbidity among employees in the slaughter and meat packing industry, 1930-34, inclusive. Brinton, H. P.; Seifert, H. B.; and Prusker, E. S. Pub. Health Rep. 51: 2103, 1936. Reprint No. 2113. O.p.

(1604) Disabling morbidity among male and female employees in mail order stores, 1930-34, inclusive. Brinton, H. P., and Prusker, E. S. Pub. Health Rep. 55: 1193, 1940. Reprint No. 2174.

(1605) Disabling sickness among 2,000 white male glass workers. Gafner, W. M. Pub. Health Rep. 56: 1791, 1941. Reprint No. 2312.

(1606) Regional variation in disabling sickness among a group of Negro male

railroad employees. Brinton, H. P. Social Forces 20: 254, 1941.

(1607) Frequency and duration of disabilities causing absence from work among the employees of a public utility, 1928-41. Gafner, W. M. Pub. Health Rep. 57: 425, 1942. Reprint No. 2371.

(1608) Frequency and duration of disabilities causing absence from work among the employees of a public utility, 1928-42. Gafner, W. M. Pub. Health Rep. 58: 1554, 1943. Reprint No. 2520.

Studies on duration of disabling sickness

(1609) Disabling sickness among industrial workers with particular reference to time changes in duration. Gafner, W. M. Am. J. Pub. Health 31: 143, 1941. Abst., 1941 Year Book of Industrial and Orthopedic Surgery. Year Book Publishers, Chicago, 1941. P. Soc. Abst., Indust. Med. 10: 20, 1941.

(1610) Studies on the duration of disabling sickness. 1. Duration of disability from sickness and nonindustrial injuries among the male and female memberships of 25 industrial sick benefit organizations, 1935-37, inclusive. Gafner, W. M., and Prusker, E. S. Pub. Health Rep. 55: 1892, 1940. Reprint No. 2201.

(1611) Studies on the duration of disabling sickness. 2. Duration of disability from sickness and nonindustrial injuries among male workers; disabilities lasting one calendar day or longer. Gafner, W. M., and Prusker, E. S. Pub. Health Rep. 57: 1378, 1942. Reprint No. 2401.

(1612) Studies on the duration of disabling sickness. 3. Duration of disability from sickness and nonindustrial injuries among the male employees of an oil refining company, with particular reference to the older worker, 1935-40, inclusive. Gafner, W. M.; Shigraeves, R.; and Prusker, E. S. Pub. Health Rep. 57: 142, 1942. Reprint No. 2360.

(1613) Studies on the duration of disabling sickness. 4. Duration of disability from the nonrespiratory-nondigestive diseases among male employees, with particular reference to the older worker. Gafner, W. M., and Shigraeves, R. Pub. Health Rep. 58: 663, 1943. Reprint No. 2487.

(1614) Studies on the duration of disabling sickness. 5. Frequency of short term absences and its relation to total frequency. Gafner, W. M., and Shigraeves, R. Pub. Health Rep. 59: 1077, 1944. Reprint No. 2572.

(1615) Studies on the duration of disabling sickness. 6. Time lost from short-term absences and its relation to total time lost. Gafner, W. M., and Sitgroves, R. Pub. Health Rep. 50: 1311, 1944. Reprint No. 2879.

(1616) Studies on the duration of disabling sickness. 7. Duration table for specific causes of disability among male workers. Gafner, W. M.; Pressie, K. S.; and Sitgroves, R. Pub. Health Rep. 63: 991, 1948. Reprint No. 2878.

Other special studies

(1617) Epidemiological study of minor respiratory diseases. Townsend, J. G., and Sydenstricker, E. Pub. Health Rep. 42: 96, 1927. Reprint No. 1132. O.p.

(1618) The illness rate among males and females. Hagerstrom mortality studies No. 6. Sydenstricker, E. Pub. Health Rep. 43: 1839, 1927. Reprint No. 1133. O.p.

(1619) Importance of respiratory diseases as a cause of disability among industrial workers. Brandage, D. K. Pub. Health Rep. 43: 603, 1927. Reprint No. 1214. O.p.

(1620) The incidence of illness among wage earning adults. Brandage, D. K. J. Indust. Hyg. 12: 228, 1930.

(1621) Nonindustrial injuries among male and female industrial employees. Grintak, H. P. Pub. Health Rep. 51: 4, 1936. Reprint No. 2925.

(1622) Industrial injuries among the urban population as recorded in the National Health Survey. Kiehn, J. Pub. Health Rep. 56: 2175, 1941. Reprint No. 2859.

(1623) The prevalence of disabling illness among male and female workers and housewives. Mallum, D. B. Pub. Health Bull. No. 293, U. S. Public Health Service, 1941. O.p. Also, Pub. Health Rep. 51: 562, 1941.

(1624) Sickness among industrial employees in Baltimore in relation to weekly hours of work. Collins, S. D. Milbank Mem. Fund Quart. 20: 368, 1948.

(1625) Estimates of disabling illness prevalence in the United States. Woodrey, F. D. Pub. Health Rep. 65: 163, 1950. Reprint No. 2905.

(1626) Disabling illness from specific causes among males and females of various ages. Collins, S. D.; Phillips,

F. R.; and Oliver, D. S. Pub. Health Rep. 50: 1649, 1941.

(1627) Trends in illness and mortality. Collins, S. D. Pub. Health Rep. 47: 497, 1932.

General papers

(1628) Statistics of disability. A compilation of some of the data available in the United States. Warren, L. H., and Sydenstricker, E. Pub. Health Rep. 31: 983, 1916. Reprint No. 335.

(1629) The sickness problem in industry. Some factors affecting the rate of claims upon the funds of mutual benefit associations. Brandage, D. K. Industry 25: No. 3, 1, 1930. Boston Business 21: No. 3, 7, 1930.

(1630) Goal for industrial hygiene. Brandage, D. K. Indust. Med. 2: 179, 1933.

(1631) The extent of illness in industry. Brandage, D. K. Nat. Safety News 129: No. 3, 32, 1934.

(1632) Occupational diseases occurring in factories and workshops of Great Britain, 1930. Gafner, W. M. Pub. Health Rep. 52: 1305, 1937.

(1633) Some implications afforded by mortality and morbidity statistics. Brandage, D. K. Am. J. Pub. Health 27: 2504, 1937.

(1634) Time lost by industrial workers from disabling sickness and accidents during the early days of disability. Gafner, W. M. Am. J. Pub. Health 23: 376, 1939.

TOXICOLOGY

GENERAL

104) Intoxications. Wilson, J. Pub. Health Rep. 31: 703.

105) Toxicology of gases and vapors. International Critical Tables Data, Physics, Chemistry, National Research Council. McGraw-Hill Book Co. 27. Vol. 2, p. 318.

106) measures for accidents and poisons. von Ottingen, W. P. Book of Chemistry. N. A. M. Parker, eds. Handbook of Chemistry, Ohio, 1933. Third

107) hazards including gases and vapors. von Ottingen, W. P. and Chapter 18, Industrial Hygiene and J. A. Goldberg, University Press, New York.

108) and potential dangers of aromatic hydrocarbons. A review of the literature. von Ottingen, W. P. Pub. Health Bull. No. 1010. Public Health Service, 1940. Pub. Health Rep. 55: 1833.

109) contaminants of drinking water. L. T. J. New Eng. Assoc. 65: 490, 1941.

110) chemical industrial hazards. von Ottingen, W. P. 22: 179, 1942. Abst., J. & Toxicol. 24: 195a, 1942.

(1654) Chlorinated solvents in common wartime use. Byers, D. H. Indust. Med. 12: 440, 1943.

(1655) The toxicity and potential dangers of aliphatic and aromatic hydrocarbons. von Ottingen, W. P. Yale J. Biol. & Med. 15: 167, 1942. Abst., J. Indust. Hyg. & Toxicol. 23: 102a, 1943.

(1656) History of the use of graphic formulas in organic chemistry. Mason, H. S. Isis 34: 316, 1943.

(1657) Common industrial solvents and their systemic effects. von Ottingen, W. P. Connecticut M. J. 8: 425, 1944.

(1658) Observations on certain inorganic industrial hazards. Fairhall, L. T. Connecticut M. J. 9: 88, 1945.

(1659) Inorganic industrial hazards. Fairhall, L. T. Physiol. Rev. 25: 185, 1945.

(1660) Facts you should know about toxic solvents. Balas, R. B. Indust. Nursing 7: 29, July 1948.

(1661) Industrial Toxicology. Fairhall, L. T. Williams and Wilkins Co., Baltimore, 1949.

(1662) A critical review of literature on the toxicity of industrial wastes and their components to fish. 1. Alkalies, acids and inorganic gases. Dooderoff, P., and Katz M. Soc. & Indust. Wastes 22: 1422, 1950.

(1663) The limitation of exposure to noxious gases and fumes in industry. Fairhall, L. T. Indust. Hyg. Newsletter 19: 3, Jan. 1950.

(1664) Toxic materials in industry. Fairhall, L. T. *Chemist* 27: 169, 1930.

AEROSOLS

(1665) Effect of repeated daily exposure of several hours to small amounts of automobile exhaust gas. Sayers, R. R.; Yant, W. P.; Levy, R.; and Fulton, W. B. *Pub. Health Bull. No. 194*, U. S. Public Health Service, 1939. *Op. Abst.*, *Pub. Health Rep.* 44: 1260, 1939.

(1666) Studies on aerosols. 1. Reduction of dust deposition in lungs of rabbits by aqueous aerosols. Dautrebande, L.; Highman, B.; and Alford, W. C. *J. Indust. Hyg. & Toxicol.* 30: 163, 1948.

(1667) Studies on aerosols. 2. Coating and agglutinating of dust particles by aqueous aerosols. Dautrebande, L.; Alford, W. C.; and Highman, B. *J. Indust. Hyg. & Toxicol.* 30: 108, 1948.

(1668) Studies on aerosols. 3. Production of liquid aerosols with an average mean vellocary diameter under one-half micron; study of agglutination of liquid micoles. Dautrebande, L.; Highman, B.; Alford, W. C.; and Weaver, F. L. *Arch. internat. pharmacodyn. et de thérap.* 76: 247, 1948.

(1669) Studies on aerosols. 4. Effect of saline aerosols on dust in atmosphere; reduction of dust deposition in lungs by saline aerosols. Dautrebande, L.; Highman, B.; Alford, W. C.; Weaver, F. L.; and Thompson, R. C. *Occup. Med.* 5: 90, 1948.

(1670) Studies on aerosols. 5. Effect of wet and pneumo-dilating aerosols on lung volume and type of respiration in man. Dautrebande, L.; Alford, W. C.; Highman, B.; Downing, R.; and Weaver, F. L. *J. Appl. Physiol.* 1: 323, 1948.

(1671) Studies on aerosols. 6. Effect of aluminum powder and NaCl aerosols upon the pulmonary deposition of silica dust (long exposure). Dautrebande, L.; Alford, W. C.; Irwin, D. A.; Mitchell, E. R.; Thompson, B. G.; Weaver, F. L.; and Wood, E. J. *Arch. internat. pharmacodyn. et de thérap.* 80: 383, 1949.

(1672) Studies on aerosols. 7. Dust aggregation with NaCl aerosols, differentiation under the electron microscope of SiO₂ dust particles and NaCl crystals. Dautrebande, L.; Kahler, H.; Lloyd, R. J.; and Mitchell, E. R. *Arch. internat. pharmacodyn. et de thérap.* 80: 413, 1949.

(1673) Air pollution and the particle size-toxicity problem. [First paper.] Okinger, H. R. *Nucleonics* 6: 60, Dec. 49.

(1674) Air pollution and the particle size-toxicity problem. 2. Methods. Stokinger, H. R., and Laskin, S. *Nucleonics* 6: 15, March 1950.

(1675) Investigation of small, airborne, charged particles by an electrical method. Daniel, J. H., and Bruckett, F. S. *Arch. Indust. Hyg. & Occup. Med.* 3: 503, 1951.

(1676) Labor deposition and retention of inhaled insoluble particulates. Stokinger, H. R.; Stoddman, L. T.; Wilson, H. R.; Sylvester, G. E.; Daniels, S.; and LaBelle, C. W. *Arch. Indust. Hyg. & Occup. Med.* 4: 349, 1951.

(1677) Surface-area measurement in experimental toxicology. Fraser, D. A. *Occup. Health* 13: 40, 1953.

(1678) Relation of particle size of amittum dioxide dust to toxicity following inhalation by animals. 2. Wilson, H. R.; Sylvester, G. E.; Laskin, S.; LaBelle, C. W.; Scott, J. K.; and Stokinger, H. R. *Arch. Indust. Hyg. & Occup. Med.* 6: 67, 1952.

(1679) Toxicology of chemical air pollutants. Stokinger, H. R. *Chemistry in Canada* 5: 23, Jan. 1953.

LABORATORY ANIMALS AND EQUIPMENT

(1680) Observations on a chronic cecum disease of laboratory rats. Stewart, H. L., and Jones, B. F. *Trans. 26th Annual Meeting, American Society of Experimental Pathology*, 1939. *P. S. Abst. Arch. Path.* 23: 768, 1939.

(1681) Chronic ulcerative colitis in the rat. Jones, B. F., and Stewart, H. L. *Pub. Health Rep.* 54: 172, 1939. *Reprints* No. 2020. *Op.*

(1682) Pathologic anatomy of chronic ulcerative colitis: A spontaneous disease of the rat. Stewart, H. L., and Jones, B. F. *Arch. Path.* 23: 87, 1941.

(1683) Mouse holders facilitating intravenous and intraperitoneal injections. Schuster, R., and Crisp, L. R. *J. Lab. & Clin. Med.* 28: 326, 1942.

(1684) An improved feeder for guinea pigs. Webster, S. H.; Lillegren, R. J., and Sumner, D. J. *J. Lab. & Clin. Med.* 28: 1610, 1943.

(1685) A micro-mixer to facilitate preparation of tissue extracts. Alford, W. C., and Palmer, R. O. *J. Lab. & Clin. Med.* 29: 1104, 1944.

(1686) Some laboratory applications of the low friction properties of the dry hypodermic syringe. Brubach, H. F. *Rev. Scient. Instruments* 18: 303, 1947.

(1687) Improved cage designs for use in handling monkeys. Brinich, H. P. Science 100: 18, 1947.

(1688) Organ: body weight ratios for liver, kidneys and spleen of laboratory animals. 1 Albino rat. Webster, S. H.; Lilegren, B. J.; and Zisner, D. J. Am. J. Anat. 81: 477, 1947.

(1689) Organ: body weight ratios for certain organs of laboratory animals. 2 Guinea pig. Webster, S. H., and Lilegren, B. J. Am. J. Anat. 85: 109, 1949.

(1690) Care of the dog used in medical research. Surgery Study Section, Nat. Inst. Health. Pub. Health Rep. Supp. No. 211, 1949.

(1691) Veterinary science important as part of industrial hygiene. Wolff, A. H. Indust. Hyg. Newsletter 10: 2, May 1950.

INORGANIC GASES

Carbon monoxide

(1692) Physiological effects of exposure to low concentrations of carbon monoxide. Sayers, R. R.; Moriweather, F. V.; and Yant, W. P. Pub. Health Rep. 37: 1127, 1922. Reprint No. 748. O.p.

(1693) Physiological effects of exposure to low concentrations of carbon monoxide. Sayers, R. R.; Moriweather, F. V.; and Yant, W. P. Bur. Mines, Rep. Invest. 2358, 1922. O.p.

(1694) Carbon-monoxide literature. Sayers, R. R., and Davenport, S. J. Pub. Health Bull. No. 150, U. S. Public Health Service, 1923. O.p.

(1695) Ventilation of vehicular tunnels. Part 2: Physiological effects of exhaust gases from motor vehicles. Henderson, Y.; Haggard, H. W.; Prince, A. L.; and Teague, M. C. J. Am. Soc. Heating & Ventilating Engrs. 32: 153, 285, 1926.

(1696) Ventilation of vehicular tunnels. Part 4: Details of tests in vehicular tunnel in Experimental Mine. Appendix II, Physiological data. Sayers, R. R.; O'Brien, H. R.; Moriweather, F. V.; and Yant, W. P. J. Am. Soc. Heating & Ventilating Engrs. 32: 757, 1926.

(1697) Ventilation of vehicular tunnels. Part 4: Details of tests in vehicular tunnel in Experimental Mine. Appendix J, Physiological tests under controlled conditions. Sayers, R. R.; Moriweather, F. V.; and Yant, W. P. J. Am. Soc. Heating & Ventilating Engrs. 32: 826, 1926.

(1698) Review of carbon monoxide poisoning. Sayers, R. R., and Davenport, S. J. Pub. Health Bull. No. 150, U. S.

Public Health Service, 1930. Revised 1935. O.p. Abstr., Pub. Health Rep. 45: 1149, 1935.

(1699) Studies in asphyxia. Yant, W. P.; Chernyak, J.; Schrenk, H. H.; Putter, F. A.; and Sayers, R. R. Pub. Health Bull. No. 211, U. S. Public Health Service, 1924. O.p. Abstr., Pub. Health Rep. 49: 1491, 1924.

(1700) Studies on the mechanism of carbon monoxide poisoning as observed in dogs anesthetized with sodium amylal. von Oettingen, W. F.; Donahue, D. D.; Valner, P. J.; and Miller, J. W. Pub. Health Bull. No. 274, U. S. Public Health Service, 1911.

(1701) Carbon monoxide: Its hazards and the mechanism of its action. von Oettingen, W. F. Pub. Health Bull. No. 290, U. S. Public Health Service, 1914.

(1702) Carbon monoxide: Its toxicity and potential dangers. Division of Industrial Hygiene, U. S. Public Health Service. Pub. Health Rep. 59: 421, 1941. Reprint No. 2242.

(1703) Studies of health hazards in industry. Carbon monoxide gas. Bloomfield, J. J. Indust. Health Monthly 11: 75, May 1931; 114, 11: 83, June 1931.

Other gases

(1704) Hydrogen sulphide as an industrial poison. Sayers, R. R.; Mitchell, C. W.; and Yant, W. P. Bur. Mines, Rep. Invest. 2401, 1923. O.p.

(1705) Hydrogen sulphide literature. Mitchell, C. W., and Davenport, S. J. Pub. Health Rep. 39: 1, 1924. Reprint No. 892. O.p.

(1706) Investigation of toxic gases from Mexican and other high-sulphur petroleum and products. Sayers, R. R.; Smith, R. A. C.; Fieldner, A. C.; Mitchell, C. W.; Jones, G. W.; Yant, W. P.; Stark, D. D.; Katz, S. H.; Bloomfield, J. J.; and Jacobs, W. A. Bur. Mines, Bull. 231, 1925. O.p.

(1707) Carbon disulphide: Its toxicity and potential dangers. Division of Industrial Hygiene, U. S. Public Health Service. Pub. Health Rep. 56: 574, 1941. Reprint No. 2239.

(1708) Hydrogen sulfide: Its toxicity and potential dangers. Division of Industrial Hygiene, U. S. Public Health Service. Pub. Health Rep. 56: 584, 1941. Reprint No. 2250.

(1709) The toxicity and potential dangers of nitrous fumes. von Oettingen

W. F. Pub. Health Bull. No. 272, U. S. Public Health Service, 1941. Abstr., Pub. Health Rep. 56: 2219, 1941.

(1710) Volatile hydrides of toxicological importance. Webster, S. H. J. Indust. Hyg. & Toxicol. 23: 167, 1946.

(1711) The toxicity and potential dangers of zinc phosphide and of hydrogen phosphide (phosphine). A review. von Oettingen, W. F. Pub. Health Rep. Supp. No. 203, 1947.

(1712) Recent advances in toxicology. Osete, Fairhall, L. T. Indust. Hyg. Newsletter 7: 14, Aug. 1947.

(1713) Industrial toxicology. Phosgene. Fairhall, L. T. Indust. Hyg. Newsletter 9: 13, Jan. 1949.

(1714) Industrial toxicology. Hydrogen cyanide and other cyanides. Fairhall, L. T. Indust. Hyg. Newsletter 11: 29, Feb. 1951.

METALS

Beryllium

(1715) The toxicity of beryllium. Hyslop, F.; Palmer, B. D.; Alford, W. C.; Monaca, A. R.; and Fairhall, L. T. Nat. Inst. Health Bull. No. 181, U. S. Public Health Service, 1943. O.p. Abstr., Indust. Med. 12: 300, 1943.

(1716) Acute inhalation toxicity of beryllium. 1. Four definitive studies of beryllium sulfate at exposure concentrations of 100, 50, 10 and 1 mg per cubic meter. Stokinger, H. E.; Spassie, G. F.; Bull, R. H.; Ashenbarg, N. J.; Scott, J. K., and Stedman, L. T. Arch. Indust. Hyg. & Occup. Med. 1: 379, 1950.

(1717) Acute inhalation toxicity of beryllium. 2. The enhancing effect of the inhalation of hydrogen fluoride vapor on beryllium sulfate poisoning in animals. Stokinger, H. E.; Ashenbarg, N. J.; DeVoldre, J.; Scott, J. K.; and Smith, F. A. Arch. Indust. Hyg. & Occup. Med. 1: 398, 1950.

(1718) Acute toxicity of inhaled beryllium. 3. Observations correlating toxicity with the physicochemical properties of beryllium oxide dust. Bull, R. H.; Scott, J. K.; Laskin, S.; Stroud, C. A.; and Stokinger, H. E. Arch. Indust. Hyg. & Occup. Med. 2: 25, 1950.

(1719) Retention of beryllium in animal tissues following inhalation of its salts. Kiger, H. E.; Stedman, L. T.; and Stroud, C. A. Atomic Energy Commission, Unpublished Document 551, April 25, 1950.

(1720) Anemia in acute experimental beryllium poisoning. Stokinger, H. E.;

Stroud, C. A.; and Root, R. B. J. Lab. & Clin. Med. 38: 173, 1951.

Lead

(1721) A source of lead contamination of cistern water. Greenberg, L. Pub. Health Rep. 37: 1825, 1922. Reprint No. 772. O.p.

(1722) Experimental studies on the effect of ethyl gasoline and its combustion products. Sayers, R. R.; Fahlmer, A. C.; Yant, W. P.; and Thomas, B. G. H. Bur. Mines, Monograph 2, 1927. O.p.

(1723) The absorption and excretion of lead arsenate in man. Fairhall, L. T., and Neal, P. A. Pub. Health Rep. 63: 1231, 1938. Reprint No. 1990. O.p.

(1724) The significance of the excretion of lead in the urine. Fairhall, L. T., and Sayers, R. R. Pub. Health Rep. 54: 2016, 1939. Reprint No. 2113. O.p.

(1725) The relative toxicity of lead and some of its common compounds. Fairhall, L. T., and Sayers, R. R. With a section on pathology by J. W. Miller. Pub. Health Bull. No. 283, U. S. Public Health Service, 1940. Abstr., Pub. Health Rep. 55: 1583, 1940.

(1726) The lead and arsenic content of urines from 40 persons with no known exposure to lead or arsenic. Webster, S. H. Pub. Health Rep. 56: 1953, 1941. Reprint No. 2322.

(1727) Twenty-four hour output of certain urinary constituents in persons exposed to lead arsenate spray residue. Webster, S. H. Pub. Health Rep. 56: 1910, 1941. Reprint No. 2318.

(1728) Diurnal variation of urinary lead excretion. Webster, S. H. Pub. Health Rep. 55: 1834, 1941. Reprint No. 2314.

(1729) The deposition and removal of lead in the soft tissues (liver, kidneys, and spleen). Fairhall, L. T., and Miller, J. W. Pub. Health Rep. 59: 1641, 1941. Reprint No. 2304. O.p.

(1730) A study of the relative toxicity of the molecular components of lead arsenate. Fairhall, L. T., and Miller, J. W. Pub. Health Rep. 56: 1610, 1941. Reprint No. 2302. O.p.

(1731) Lead and arsenic ingestion and excretion in man. Webster, S. H. Pub. Health Rep. 56: 1359, 1941. Reprint No. 2290.

(1732) The relation of protein intake to lead poisoning in rats. Baerstein, H. D., and Grand, J. A. J. Pharmacol. & Exper. Therap. 74: 18, 1942. Abstr., J. Indust. Hyg. & Toxicol. 24: 95a, 1942.

(1733) The identification and localization of lead in bone tissue. Fairhall, L. T. Pub. Health Rep. 58: 230, 1943. Reprint No. 2445. Abst., J. Indust. Hyg. & Toxicol. 25: 82n, 1943.

(1734) The toxicity of lead oxide. Fairhall, L. T.; Jourdie, W. V.; James, R. W.; and Pritchard, R. A. Pub. Health Rep. 58: 697, 1943. Reprint No. 2470. Abst., J. Indust. Hyg. & Toxicol. 25: 128n, 1943.

(1735) The effect of arsenates on the storage of lead. Fairhall, L. T.; Miller, J. W.; and Weaver, F. L. Pub. Health Rep. 58: 655, 1943. Reprint No. 2485. Abst., J. Indust. Hyg. & Toxicol. 25: 178n, 1943.

(1736) Influence of iron salts on the toxicity of lead. Heppel, L. A., and Kornberg, A. Proc. Soc. Exper. Biol. & Med. 61: 220, 1946.

(1737) The efficacy of BAL (2,3-dimercaptosuccinyl) in the treatment of experimental lead poisoning in rabbits. Gerzant, P. G., and Bagle, H. J. Pharmacol. & Exper. Therap. 62: 397, 1948.

(1738) BAL therapy in lead poisoning. A review of the literature. Division of Industrial Hygiene, U. S. Public Health Service. Indust. Hyg. Newsletter 9: 5, April 1949.

Selenium

(1739) Toxicology of selenium. 1. A study of the distribution of selenium in acute and chronic cases of selenium poisoning. Dudley, H. C. Am. J. Hyg. 29: 169, 1936.

(1740) Toxicology of selenium. 2. The urinary excretion of selenium. Dudley, H. C. Am. J. Hyg. 28: 181, 1935.

(1741) Toxicology of selenium. 3. Determination of selenium in air-gas-dust mixtures. Dudley, H. C. Am. J. Hyg. 24: 227, 1935.

(1742) Toxicology of selenium. 4. Effects of exposure to hydrogen selenide. Dudley, H. C., and Miller, J. W. Pub. Health Rep. 52: 1297, 1937. Reprint No. 1875. O.p.

(1743) Toxicology of selenium. 5. Toxic and vesical properties of selenium oxychloride. Dudley, H. C. Pub. Health Rep. 53: 94, 1938. Reprint No. 1901. O.p.

(1744) Selenium as a potential industrial hazard. Dudley, H. C. Pub. Health Rep. 53: 281, 1938. Reprint No. 2010. O.p.

(1745) Significance of selenium as an industrial hazard. Dudley, H. C. Indust. Med. 7: 235, 1938.

(1746) Studies in chronic selenosis. Smith, M. L.; Little, R. D.; Stokmann, E. F.; and Weisfall, B. R. Nat. Inst. Health Bull. No. 171, U. S. Public Health Service, 1940.

(1747) Toxicology of selenium. 6 Effects of subacute exposure to hydrogen selenide. Dudley, H. C., and Miller, J. W. J. Indust. Hyg. & Toxicol. 23: 475, 1941.

Other metals

(1748) The importance of tellurium as a health hazard in industry. Shie, M. D., and Hoels, F. R. Pub. Health Rep. 35: 929, 1920. Reprint No. 690. O.p.

(1749) The toxicity of sodium telluroxide (sener acid). Brunot, P. R. J. Indust. Hyg. 15: 155, 1933.

(1750) Zinc in relation to general and industrial hygiene. Drinker, C. K., and Fairhall, L. T. Pub. Health Rep. 48: 953, 1933. Reprint No. 1539. O.p.

(1751) Some recent observations on phosphorus toxicology. Fleming, R. B. L.; Miller, J. W.; and Swayne, V. R., Jr. J. Indust. Hyg. & Toxicol. 24: 154, 1942.

(1752) Cadmium poisoning. Division of Industrial Hygiene, U. S. Public Health Service. Pub. Health Rep. 57: 601, 1942. Reprint No. 2371. O.p. Abst., J. Indust. Hyg. & Toxicol. 24: 130n, 1942.

(1753) Industrial manganese poisoning. Fairhall, L. T., and Neal, P. A. Nat. Inst. Health Bull. No. 183, U. S. Public Health Service, 1943. Abst., J. Indust. Hyg. & Toxicol. 25: 140n, 1943.

(1754) The toxicity of molybdenum. Fairhall, L. T.; Dunn, R. C.; Sharpless, N. R.; and Pritchard, R. A. Pub. Health Bull. No. 293, U. S. Public Health Service, 1945.

(1755) The biological, hygienic, and medical properties of zinc and zinc compounds. Hogsted, D. M.; McKibbin, J. M.; and Drinker, C. K. Pub. Health Rep. Supp. No. 179, 1945.

(1756) The toxicology of the heavier metals. Fairhall, L. T. Brit. J. Indust. Med. 3: 297, 1946.

(1757) Recent advances in toxicology. Cobalt. Fairhall, L. T. Indust. Hyg. Newsletter 6: 6, Oct. 1946. Cadmium. Ibid. 6: 6, Nov. 1946. Barium. Ibid. 6: 7, Dec. 1946. Vanadium. Ibid. 7: 6 Jan. 1947. Thorium. Ibid. 7: 6, Feb. 1947. Platinum. Ibid. 7: 9, March 1947. Tellurium. Ibid. 7: 9, March 1947. Selenium. Ibid. 7: 9, March 1947. Tin. Ibid. 7: 9, May 1947. Chromium. Ibid. 7: 15, June 1947. Bismuth. Ibid. 7: 6, Sept. 1947. Antimony. Ibid. 7: 12, Nov. 1947.

(1758) The toxicology of antimony. Fairhall, L. T., and Hyslop, F. Pub. Health Rep. Supp. No. 105, 1947.

(1759) Thalium. A review. Heyroth, F. F. Pub. Health Rep. Supp. No. 107, 1947.

(1760) Toxicology of the heavy metals. Fairhall, L. T. J. Indiana Med. Assoc. 41: 917, 1948.

(1761) Industrial toxicology. Mercury. Fairhall, L. T. Indust. Hyg. Newsletter 0: 10, March 1949.

(1762) Acute toxicity of inhaled thorium compounds. Duff, R. H.; Stroud, C. A.; Scott, J. K.; Root, R. B.; Steadman, L. T.; and Stoklager, H. B. University of Rochester, New York. Atomic Energy Project (UR-190), 1951. Unclassified.

ORGANIC (ALIPHATIC COMPOUNDS)

Halogenated hydrocarbons

(1763) Toxic effects of ethylene dichloride. Thomas, B. G. H., and Yant, W. P. Pub. Health Rep. 42: 370, 1927. Reprint No. 1139. O.p.

(1764) Microscopic pathology attending exposure of guinea pigs to vapors of ethyl bromide. Waite, C. P., and Yant, W. P. Pub. Health Rep. 43: 2270, 1928. Reprint No. 1244. O.p.

(1765) Physiological response attending exposure to vapors of methyl bromide, methyl chloride, ethyl bromide, and ethyl chloride. Sayers, R. R.; Yant, W. P.; Thomas, B. G. H.; and Berger, L. B. Pub. Health Bull. No. 183, U. S. Public Health Service, 1929. O.p. Abst., Pub. Health Rep. 41: 1191, 1929.

(1766) Toxicity of dichlorodifluoromethane: A new refrigerant. Sayers, R. R.; Yant, W. P.; Chernyak, J.; and Shontz, H. W. Bur. Mines, Rep. Invest. 3013, 1930. O.p.

(1767) Acute response of guinea pigs to vapors of some new commercial organic compounds: 1. Ethylene dichloride. Sayers, R. R.; Yant, W. P.; Waite, C. P.; and Patry, F. A. Pub. Health Rep. 45: 225, 1930. Reprint No. 1349. O.p.

(1768) Observations on the possibility of methyl chloride poisoning by ingestion with food and water. Yant, W. P.; Shontz, H. W.; and Chernyak, J. Pub. Health Rep. 45: 1657, 1930. Reprint No. 1371. O.p.

(1769) Acute response of guinea pigs to vapors of some new commercial organic compounds: 5. Vinyl chloride. Patry,

F. A.; Yant, W. P.; and Waite, C. P. Pub. Health Rep. 45: 1903, 1930. Reprint No. 1405.

(1770) Chloroform. von Oettingen, W. P. Occupation and Health, Supplement. International Labour Office, Geneva, 1930.

(1771) Studies on foodstuffs fumigated with methyl bromide. Dudley, H. C.; Miller, J. W.; Neal, P. A.; and Sayers, R. R. Pub. Health Rep. 55: 2261, 1930. Reprint No. 2215.

(1772) Methyl bromide as a fumigant for foods. Dudley, H. C., and Neal, P. A. Food Research 7: 422, 1942.

(1773) Fatal methyl bromide poisoning. Miller, J. W. Arch. Path. 35: 505, 1933.

(1774) Toxicology of dichloromethane (methylene chloride). 1. Studies on effects of daily inhalation. Heppel, L. A.; Neal, P. A.; Perrin, T. L.; Orr, M. J.; and Porterfield, V. T. J. Indust. Hyg. & Toxicol. 26: 8, 1944.

(1775) Toxicology of dichloromethane (methylene chloride). 2. Its effect upon running activity in the male rat. Heppel, L. A., and Neal, P. A. J. Indust. Hyg. & Toxicol. 26: 17, 1944.

(1776) Toxicology of dichloroethane. 1. Effect on the cornea. Heppel, L. A.; Neal, P. A.; Endicott, K. M.; and Porterfield, V. T. Arch. Ophthalm. 32: 391, 1944.

(1777) Toxicology of 1,2-dichloroethane (ethylene dichloride). 2. Influence of dietary factors on the toxicity of dichloroethane. Heppel, L. A.; Neal, P. A.; Duff, P. S.; Endicott, K. M.; Orr, M. J.; and Porterfield, V. T. J. Indust. Hyg. & Toxicol. 27: 15, 1945.

(1778) The toxicology of 1,2-dichloroethane (ethylene dichloride). 3. Its acute toxicity and the effect of protective agents. Heppel, L. A.; Neal, P. A.; Perrin, T. L.; Endicott, K. M.; and Porterfield, V. T. J. Pharmacol. & Exper. Therap. 84: 53, 1945.

(1779) The toxicity and potential dangers of methyl bromide with special reference to its use in the chemical industry, in fire extinguishers, and in fumigation. von Oettingen, W. P. Nat. Inst. Health Bull. No. 185, U. S. Public Health Service, 1940.

(1780) The protective action of cystine and methionine in rats exposed to methyl chloride. Smith, W. W. Federation Proc. 5: 97, 1946.

(1781) Toxicology of 1,2-dichloropropane (propylene dichloride). 1. Studies on effects of daily inhalations. Heppel, L. A.; Neal, P. A.; Hightman, B.; and Porterfield, V. T. J. Indust. Hyg. & Toxicol. 28: 1, 1946.

2) Toxicology of 1,2-dichloropropane (propylene dichloride). 2. Influence of any factors on the toxicity of dichloropropane. Hoppel, L. A.; Highman, B.; Porterfield, V. T. *J. Pharmacol. & ex. Therap.* 87: 11, 1946.

3) Toxicology of 1,2-dichloropropane (propylene dichloride). 3. Pathologic changes produced by a short series of exposures. Highman, B., and Peck, L. A. *Arch. Path.* 42: 525, 1942.

4) Toxicology of 1,2-dichloroethane (ethylene dichloride). 5. The effects of inhalations. Hoppel, L. A.; Neal, C.; Peck, L. A.; Butler, K. M.; Porterfield, V. T. *J. Indust. Hyg. & Coll.* 28: 113, 1946.

5) The acute and chronic toxicity of ethyl chloride. 1. Mortality resulting from exposures to methyl chloride in concentrations of 4000 to 300 parts per cent. Smith, W. W., and von Ottingen, W. F. *J. Indust. Hyg. & Toxicol.* 20: 947.

6) Toxicology of 1,2-dichloroethane (ethylene dichloride). 4. Its detoxication by L-cystine, di-methionine and ceruloplasmin containing compounds. ed. L. A.; Porterfield, V. T.; and Peck, L. A. *J. Pharmacol. & Exper. ap.* 61: 355, 1947.

7) The acute and chronic toxicity of ethyl chloride. 2. Symptomatology of rats poisoned by methyl chloride. h, W. W., and von Ottingen, W. F. *Dust, Hyg. & Toxicol.* 20: 123, 1947.

8) The acute and chronic toxicity of ethyl chloride. 3. Hematology and identical studies. Smith, W. W. *J. Indust. Hyg. & Toxicol.* 20: 185, 1947.

9) Acute and chronic toxicity of ethyl chloride. 4. Histopathologic studies. Thum, R. C., and Smith, C. *Arch. Path.* 48: 290, 1947.

10) The toxicity and narcotic action monochloro-monoethano-methane with a reference to inorganic and volatile acids in blood, urine and brain. ed. J. L.; Highman, B.; Alford, W. and von Ottingen, W. F. *J. Indust. & Toxicol.* 20: 382, 1947.

11) Toxicology of 1,2-dichloropropane (propylene dichloride). 4. Effects of repeated exposures to a low concentration of vapor. Hoppel, L. A.; Highman, B. and Peck, L. G. *J. Indust. Hyg. & Coll.* 30: 123, 1948.

12) Influence of various protective agents in preventing fatty changes by carbon tetrachloride. Highman, B. *Abst., Federation Proc.* 7: 272, 1948.

13) Carbon tetrachloride poisoning. A study on ten cases at the U. S. Marine

Hospital, Seattle, Washington, since 1937. Abbott, G. A., and Miller, M. J. *Pub. Health Rep.* 63: 1019, 1948. Reprint No. 2304.

(1794) Comparative studies of the toxicity and physiological action of chlorinated methanes with reference to their physical and chemical characteristics. von Ottingen, W. F.; Powell, C. C.; Sharpless, N. E.; and Peck, L. J. *Abst., Federation Proc.* 7: 262, 1948.

(1795) The influence of thionurea and thionurea on the response of rats to methyl chloride. Smith, W. W. *Abst., Federation Proc.* 7: 117, 1948.

(1796) Pathologic changes produced by monochloro-monoethano-methane. Highman, B.; Svirchely, J. L.; von Ottingen, W. F.; Alford, W. C.; and Peck, L. J. *Arch. Path.* 45: 229, 1945.

(1797) Industrial toxicology. Tetrachloroethylene. Fairhall, L. C. *Indust. Hyg. Newsletter* 8: 7, May 1948.

(1798) Industrial toxicology. Carbon tetrachloride. Fairhall, L. C. *Indust. Hyg. Newsletter* 8: 6, July 1948.

(1799) Relation between the toxic action of chlorinated methanes and their chemical and physicochemical properties. von Ottingen, W. F.; Powell, C. C.; Sharpless, N. E.; Alford, W. C.; and Peck, L. J. *Nat. Inst. Health Bull.* No. 109, U. S. Public Health Service, 1949.

(1800) Distribution and excretion of intravenously administered methyl chloride. Sperting, E.; Macri, F. J.; and von Ottingen, W. F. *Arch. Indust. Hyg. & Occup. Med.* 1: 215, 1950.

(1801) Comparative studies of the toxicity and pharmacodynamic action of chlorinated methanes with special reference to their physical and chemical characteristics. von Ottingen, W. F.; Powell, C. C.; Sharpless, N. E.; Alford, W. C.; and Peck, L. J. *Arch. Internat. de pharmacodyn. et de therap.* 81: 17, 1950.

(1802) Toxicology of 1,2-dichloroethane (ethylene dichloride). 5. Effect of protective agents on visceral fatty changes in exposed rats. Highman, B.; Hoppel, L. A.; and Lamprey, E. J. *Arch. Path.* 51: 346, 1951.

Nitro and nitrile compounds

(1803) Toxicology of acrylonitrile (vinyl cyanide). 1. A study of the acute toxicity. Dudley, H. O., and Neal, P. A. *J. Indust. Hyg. & Toxicol.* 24: 27, 1942.

(1804) Toxicology of acrylonitrile (vinyl cyanide). 2. Studies of effects of inhalation. Dudley, H. O.; *Respiration* 7

R.; and Miller, J. W. *J. Indust. Hyg. & Toxicol.* 24: 294, 1942.

(1801) Toxicity and potential dangers of pentacythritol-tetranitrate (PENTN). von Oettingen, W. F.; Donahue, D. D.; Lawton, A. H.; Monaca, R. A.; Yodanis, H.; and Valner, P. J. *Pub. Health Bull.* No. 282, U. S. Public Health Service, 1944.

(1806) The effects of aliphatic nitroso and nitric acid esters on the physiological functions with special reference to their chemical constitution. von Oettingen, W. F. *Nat. Inst. Health Bull.* No. 191, U. S. Public Health Service, 1940.

(1807) Toxic effects of tetraethylenethiame, a contaminant in crude TNT. Seyers, R. F.; Rushing, D. E.; Gay, H.; and Monaca, A. R. *Pub. Health Rep.* 62: 1048, 1947. Reprint No. 2708.

(1808) Experimental medullary necrosis of the kidney; a morphologic and functional study. Mendel, R. E., and Pappas, H. *Arch. Path.* 62: 1, 1931.

Other aliphatic compounds

(1809) Acute response of guinea pigs to vapors of some new commercial organic compounds. 3. "Cellulose" (monoethyl ether of ethylene glycol). Walte, C. F.; Patty, F. A.; and Yant, W. P. *Pub. Health Rep.* 45: 1459, 1930. Reprint No. 1380. O.p.

(1810) Acute response of guinea pigs to vapors of some new commercial organic compounds. 4. Ethylene oxide. Walte, C. F.; Patty, F. A.; and Yant, W. P. *Pub. Health Rep.* 45: 1822, 1930. Reprint No. 1381. O.p.

(1811) Acute response of guinea pigs to vapors of some new commercial organic compounds. 6. Dioxan. Yant, W. P.; Schreck, H. H.; Walte, C. F.; and Patty, F. A. *Pub. Health Rep.* 45: 2023, 1930. Reprint No. 1407. O.p.

(1812) Acute response of guinea pigs to vapors of some new commercial organic compounds. 7. Diethylacetyl ether. Schreck, H. H.; Patty, F. A.; and Yant, W. P. *Pub. Health Rep.* 48: 8189, 1933. Reprint No. 1692. O.p.

(1813) Acute response of guinea pigs to vapors of some new commercial organic compounds. 8. Butanone. Patty, F. A.; Schreck, H. H.; and Yant, W. P. *Pub. Health Rep.* 50: 1217, 1935. Reprint No. 18.

(1814) Acute response of guinea pigs to vapors of some new commercial organic compounds. 9. Pentanone (methyl propyl

ketone). Yant, W. P.; Patty, F. A.; and Schreck, H. H. *Pub. Health Rep.* 51: 302, 1936. Reprint No. 1739.

(1815) Acute response of guinea pigs to vapors of some new commercial organic compounds. 10. Hexanone (methyl butyl ketone). Schreck, H. H.; Yant, W. P.; and Patty, F. A. *Pub. Health Rep.* 54: 624, 1939. Reprint No. 1747.

(1816) Acute response of guinea pigs to vapors of some new commercial organic compounds. 11. Secondary amyl acetate. Patty, F. A.; Yant, W. P.; and Schreck, H. H. *Pub. Health Rep.* 51: 811, 1936. Reprint No. 1750.

(1817) Acute response of guinea pigs to vapors of some new commercial organic compounds. 12. Normal butyl acetate. Sayers, R. E.; Schreck, H. H.; and Patty, F. A. *Pub. Health Rep.* 51: 1229, 1936. Reprint No. 1759.

(1818) Acute response of guinea pigs to vapors of some new commercial organic compounds. 13. Methyl formate. Schreck, H. H.; Yant, W. P.; Chornayuk, J.; and Patty, F. A. *Pub. Health Rep.* 51: 1320, 1936. Reprint No. 1778.

(1819) Acute response of guinea pigs to inhalation of methyl isobutyl ketone. Specht, H. *Pub. Health Rep.* 53: 2952, 1938. Reprint No. 1911. O.p.

(1832) The toxicity of methylal. Weaver, P. L., Jr.; Hough, A. R.; Hightman, B.; and Fairhall, L. T. Brit. J. Indust. Med. 8: 279, 1951.

ORGANIC (AROMATIC COMPOUNDS)

Amino and nitro compounds

(1833) Trinitrotoluol. Practical points in its safe handling. Schereschewsky, J. W. Pub. Health Rep. 52: 1910, 1917. Reprint No. 434. O.p.

(1834) 1. Trinitrotoluene poisoning—its nature, diagnosis, and prevention. Voegtlin, C.; Hooper, O. W.; and Johnson, J. M. 2. The toxic action of picramol. Voegtlin, C.; Livingston, A. E.; and Hooper, O. W. 3. Mercury fulminate as a skin irritant. Livingston, A. E. Hyg. Laboratory Bull. No. 129, U. S. Public Health Service, 1920. O.p.

(1835) The aromatic amino and nitro-compounds, their toxicity and potential dangers: A review. von Oettingen, W. P. Pub. Health Bull. No. 271, U. S. Public Health Service, 1941.

(1836) Notes on the pathology of experimental trinitrotoluene poisoning. Lilje, H. D. Pub. Health Rep. 58: 1429, 1943. Reprint No. 2511.

(1837) A new test for the detection and appraisal of exposure to trinitrotoluene. Snyder, R. K., and von Oettingen, W. P. J. A. M. A. 123: 202, 1943.

(1838) Experimental trinitrotoluene poisoning with attempts at detoxification. Smith, M. I.; Westfall, B. B.; and Steinhilber, R. P. J. Indust. Hyg. & Toxicol. 25: 391, 1943.

(1839) Experimental studies on the toxicity and potential dangers of trinitrotoluene (TNT). von Oettingen, W. P.; Doushamp, D. D.; Snyder, R. K.; Giesecker, B. L.; Munson, A. R.; Lawton, A. H.; Sweeney, T. H.; and Neal, P. A. Pub. Health Bull. No. 285, U. S. Public Health Service, 1944.

(1840) Metabolites of 2, 4, 6-trinitrotoluene (TNT) excreted in the urine of dogs. Snyder, R. K. J. Indust. Hyg. & Toxicol. 25: 69, 1943.

(1841) Blood dyscrasia in mice ingesting toluidine base. Dunn, T. B. Abst., Federation Proc. 8: 333, 1949.

(1842) The effect of hypoxia on the *in vivo* formation of methemoglobin by aniline and nitrate. Speer, S. S., and Neal, P. A. J. Pharmacol. & Exper. Therap. 65: 488, 1940.

(1843) Industrial toxicology. Dinitro-ortho-cresol. Fairhall, L. T. Occup. Health 12: 132, 1952.

Benzene, benzene derivatives and homologues

(1844) Benzol poisoning as an industrial hazard: A review. Greenburg, L. 1. The chemistry and industrial uses of benzol. 2. Acute benzol poisoning. Pub. Health Rep. 41: 1357, 1923. 3. Previous studies of chronic benzol poisoning. 4. The effect of benzol upon the blood cells and its use as a therapeutic agent. 5. The extent of the benzol hazard in industry in the United States. Ibid. 41: 1440, 1923. 6. Intensive study of selected industries with respect to factory conditions and pollution of the atmosphere by benzol. 7. Results of medical examination and clinical tests made to discover early signs of benzol poisoning in exposed workers. 8. Bibliography. Ibid. 41: 1510, 1920. Reprint No. 1806. O.p.

(1845) Benzol poisoning as a possible hazard in chemical laboratories. Bloomfield, J. J. Pub. Health Rep. 43: 1895, 1923. Reprint No. 1237. O.p.

(1846) Comparative physiological effects of pure, commercial and crude benzenes. Schreck, H. H.; Yant, W. P.; Pearce, S. J.; and Sayers, R. R. J. Indust. Hyg. & Toxicol. 22: 53, 1940.

(1847) Benzene (benzol): Its toxicity and potential dangers. Division of Industrial Hygiene, U. S. Public Health Service. Pub. Health Rep. 69: 519, 1941. Reprint No. 2348.

(1848) The effects of exposure to toluene in industry. Greenburg, L.; Mayers, M. R.; Heumann, H.; and Moskowitz, S. J. A. M. A. 118: 573, 1942.

(1849) The toxicity and potential dangers of toluene. von Oettingen, W. F.; Neal, P. A.; and Donahue, D. D. J. A. M. A. 118: 570, 1942. Abst. J. Indust. Hyg. & Toxicol. 21: 189n, 1942.

(1850) The toxicity and potential dangers of toluene, with special reference to its maximal permissible concentration. von Oettingen, W. F.; Neal, P. A.; Donahue, D. D.; Scribely, J. L.; Baernstein, H. D.; Monaco, A. R.; Valner, P. J.; and Mitchell, J. L. Pub. Health Bull. No. 379, U. S. Public Health Service, 1942. Abst. Pub. Health Rep. 57: 1477, 1942, and J. Indust. Hyg. & Toxicol. 21: 175a, 1942.

(1851) Effects of exposure to toluene used as component of paints. Greenburg, L.; Mayers, M. R.; Heumann, H.; and Moskowitz, S. Indust. Bull., State of New York 22: 122, March 1943.

(1852) The acute toxicity of benzene, toluene, xylene #2, and toluene. Scribely, J. L. Federation Proc. 2: 93, 1943.

(1853) The acute toxicity of vapors of certain solvents containing appreciable amounts of benzene and toluene. Scribely, J. L.; Dunn, R. C.; and von Oettingen, W. F. J. Indust. Hyg. & Toxicol. 25: 390, 1943. Abst., Indust. Med. 12: 204, 1943.

(1854) The chronic toxicity of moderate concentrations of benzene, and of mixtures of benzene and its homologues for rats and dogs. Scribely, J. L.; Dunn, R. C.; and von Oettingen, W. F. J. Indust. Hyg. & Toxicol. 29: 37, 1944.

(1855) The comparative efficiency of various liver function tests in detecting hepatic damage produced in dogs by xylidine. Scribely, J. L.; Monaco, A. R.; and Afford, W. C. J. Lab. & Clin. Med. 31: 1132, 1949.

(1856) Xylidine (c, e-dimethylaniline): Its toxicity and potential dangers as compared with those of aniline and an appraisal of the potential hazards from its use in blending gasoline. von Oettingen, W. F.; Neal, P. A.; Stevens, R. F.; Scribely, J. L.; Monaco, A. R.; Horvicker, R. L.; Yagoda, H.; Sweeting, T. R.; Peterson, D. C.; Afford, W. C.; Hanft, V. B.; and Gay, H. Nat. Inst. Health Bull. No. 188, U. S. Public Health Service, 1947.

(1857) Phenol and its derivatives: The relation between their chemical constitu-

tion and their effect on the organism. von Oettingen, W. F. Nat. Inst. Health Bull. No. 180, U. S. Public Health Service, 1946.

(1858) Toxic and pathologic effects of xylidine in the fasting and non-fasting states. Spicer, S. S.; Highman, B.; and Monaco, A. R. J. Pharmacol. & Exper. Therap. 65: 256, 1940.

(1859) The toxicity of some related halogenated derivatives of phenol. Stehman, R. P. Pub. Health Rep. 66: 1303, 1941.

(1860) Studies of health hazards in industry. Benzol vapor. Bloomfield, J. J. Indust. Health Monthly 11: 62, April 1951.

Other aromatic compounds

(1861) Acute response of guinea pigs to vapors of some new commercial organic compounds. 2-Ethyl benzene. Yant, W. P.; Schreck, H. H.; Walke, C. F.; and Petty, F. A. Pub. Health Rep. 45: 1213, 1930. Reprint No. 1879. O.p.

(1862) The acute effects of camene vapors in mice. Warner, H. W.; Dunn, R. C.; and von Oettingen, W. F. J. Indust. Hyg. & Toxicol. 20: 394, 1944.

(1863) The metabolism of camene by the dog. Donahue, D. D., and Harris, M. H. Federation Proc. 4: 116, 1945.

(1864) Congenital idiosyncratic methemoglobinemia: Favorable response to ascorbic acid therapy. Stevens, R. F., and Ryan, J. R. Arch. Int. Med. 70: 2899, 1945.

(1865) Report on an appraisal of the toxicity and potential dangers of solvents consisting essentially of methylated naphthalene derivatives to be used as solvents for DDT in insecticidal mixtures. Scribely, J. L.; Dunn, J. R.; Neal, P. A.; Dunn, R. C.; Afford, W. C.; Boeglin, C. G.; Peterson, D. C.; and von Oettingen, W. F. Studies on methylated naphthalene derivatives. Nat. Research Council Insect Control Committee, Rep. No. 163, 1946.

(1866) A note on methemoglobinemia and Heinz body formation in cats fed commercial crayon. Spicer, S. S.; Hanna, C. H.; and Neal, P. A. J. Pediatr. 33: 739, 1948.

(1867) Toxicity and potential dangers of cyclooctamethylenediamine (RDX). von Oettingen, W. F.; Donahue, D. D.; Yagoda, H.; Monaco, A. R.; and Harris, M. R. J. Indust. Hyg. & Toxicol. 31: 21, 1949.

(1868) Industrial toxicology. Asphalt and related bitumens. Fuhrman, L. T. Indust. Hyg. Newsletter 10: 9, May 1950.

(1880) Industrial toxicology. Nicotine. Fairhall, L. T. Indust. Hyg. Newsletter. 10: 14, August 1959.

(1879) Survey of literature relating to infant methemoglobinemia due to nitrate-contaminated water. Walton, G. Am. J. Pub. Health 44: 880, 1953.

ECONOMIC POISONS

Insecticides

(1871) Toxicity and potential dangers of aerosols, mists, and dusting powders containing DDT. Neal, P. A.; von Oettingen, W. F.; Smith, W. W.; Malone, R. B.; Dunn, R. C.; Moran, H. R.; Sweeney, T. R.; Armstrong, D. W.; and White, W. C. Pub. Health Rep. Supp. 177, 1944. 6 p.

(1872) Toxicity and potential dangers of aerosols and residues from such aerosols containing three percent DDT. Neal, P. A.; von Oettingen, W. F.; Dunn, R. C.; and Sharpless, N. B. Pub. Health Rep. Supp. No. 183, 1945. Second report.

(1873) The metabolism of 2, 2 bis-(p-chlorophenyl) 1, 1, 1 trichloroethane (DDT). I. A metabolic from rabbit urine, di-(p-chlorophenyl) acetic acid; its isolation, identification, and synthesis. White, W. C., and Sweeney, T. R. Pub. Health Rep. 60: 64, 1945. Reprint No. 2590.

(1874) Further studies on the pharmacologic action of 2, 2 bis-(p-chlorophenyl) 1, 1, 1 trichloroethane (DDT). Smith, M. L., and Rudman, R. P. Pub. Health Rep. 60: 280, 1945. Reprint No. 2600.

(1875) DDT toxicity. A report on the toxicity to warm-blooded animals of aerosols, mists, and dusting powders containing DDT. Neal, P. A. Soap & Sanitary Chemists, Jan. 1945.

(1876) The toxicity and potential dangers of DDT in humans and warm-blooded animals. Neal, P. A., and von Oettingen, W. F. M. Ann. District of Columbia 15: 15, 1946.

(1877) The excretion of DDT (2, 2-bis-(p-chlorophenyl) 1, 1, 1-trichloroethane) in man, together with clinical observations. Neal, P. A.; Sweeney, T. R.; Spier, S. S.; and von Oettingen, W. F. Pub. Health Rep. 61: 403, 1946. Reprint No. 2608.

(1878) The toxicity and toxic manifestations of 2, 2-bis-(p-chlorophenyl) 1, 1, 1-trichloroethane (DDT) as influenced by chemical changes in the molecule. von Oettingen, W. F., and Sharpless, N. B. J. Pharm. & Exper. Therap. 88: 450, 1946.

(1879) Skin-sensitizing properties of DDT for the guinea pig. Dunn, J. R., Dunn, R. C., and Smith, R. S. Pub. Health Rep. 61: 1014, 1946. Reprint No. 2754.

(1880) Toxicity of DDT—a report on experimental studies. Neal, P. A., and von Oettingen, W. F. Soap & Sanitary Chemists 23: 133, July 1946.

(1881) Some physical properties of DDT and certain derivatives. Andrews, H. L.; White, W. C.; Gamm, L. R.; and Peterson, D. C. Pub. Health Rep. 61: 459, 1946.

(1882) Toxicological observations on goats fed large doses of DDT. Spicer, S. S.; Sweeney, T. R.; von Oettingen, W. F.; Lillie, R. D.; and Neal, P. A. Vet. Med. 42: 289, 1947.

(1883) DDT for control of household pests. U. S. Department of Agriculture, and U. S. Public Health Service. Government Printing Office, Washington, 1947.

(1884) Benzene hexachloride. Fairhall, L. T. Indust. Hyg. Newsletter 8: 15, Jan. 1948.

(1885) Toxicity of gamma-benzene hexachloride in clothing. Horton, R. G.; Krael, L.; and Chadwick, L. E. Science 107: 240, 1948.

(1886) Industrial toxicology. Dichlorobenzene. Fairhall, L. T. Indust. Hyg. Newsletter 8: 10, Dec. 1948.

(1887) Pharmacologic action of chloroform. Steinhilber, E. F.; Thorp, W. T. S.; and Smith, M. L. Abst., Federation Proc. 8: 334, 1949.

(1888) Industrial toxicology. The newer insecticides. Fairhall, L. T. Indust. Hyg. Newsletter 9: 8, July 1949.

(1889) The newer insecticides and rodenticides and their use. McNeal, T. R. Bull. A. Food and Drug Admin., U. S. 14: 142, 1950.

(1890) The newer economic poisons of use in disease control. Uphoff, W. M. Communicable Disease Center Bull. 9: 7, Nov. 1950.

(1891) Benefits and hazards of insecticides to public health. Hayes, W. L., Jr., and Hinesman, S. W. Agricultural Control Chemicals. Advances in Chemistry Series 1. American Chemical Soc. Washington, 1950. P. 56.

(1892) Chemistry and toxicity of so organochlorine insecticides. Sumner, W. T. Agricultural Control Chemicals. Advances in Chemistry Series 1. American Chemical Society, Washington, 1950. P. 100.

(1893) Toxicological action and metabolic fate of chlordan. Stoltzman, E. F., and Smith, M. I. Agricultural Control Chemicals. Advances in Chemistry Series 1. American Chemical Society, Washington, 1950. P. 228.

(1894) Some current developments in the use of economic poisons. Simmons, S. W. Proc. Annual Meeting, South. Branch Am. Pub. Health Assoc., 1950. P. 50.

(1895) Toxic action of chlordan. Stoltzman, E. F.; Thorp, W. T. S.; and Smith, M. I. Arch. Indust. Hyg. and Occup. Med. 1: 13, 1950.

(1896) Time-motion study shows and exposure time of residual spray labor to DDT. Stephens, P. A. Communicable Disease Center Bull. 9: 18, Jan. 1950.

(1897) The newer insecticides. Fairhall, L. T. Mod. Sanitation 2: 29, Feb. 1950.

(1898) Important organic insecticides. Physiological effects and suggested treatment. Hough, J. W. Indust. Hyg. Newsletter 10: 40, April 1950.

(1899) Toxicology of insecticides. Hayes, W. J., Jr. Communicable Disease Center Bull. 9: 4, Nov. 1950.

Books—Continued

Proceedings Ninth International Congress of Industrial Medicine, 811
Radioactive Measurements with Nuclear Emulsions, 1283
Rural Health and Medical Care, 1178
Silicosis and Asbestosis, 851, 806
Textbook of Clinical Pathology, 661
Tuberculosis in Industry, 764
Brass foundry, health hazards in, 1160
Bromine, content of fruits, fumigated with methyl bromide, 29
distribution, in poisoning by monochloro-monobromo-methane, 1790
Bronchitis, 1520, 1521, 1530
Brushes, shoring, anthrax and sterilization, 743, 761
Burns, cleansing of oil-covered skin, and, 1152
hydrofluoric acid, treatment of, 1132
salt and soda for shock in, 1150
Bus and cab companies, sickness among employees, 1620
Butanone, acute response of guinea pigs to, 1813
Butyl acetate, acute response of guinea pigs to, 1817
Cable rack, halowax acid, 150, 160, 168, 172
Cadmium, plating, health hazards of, 1100, 1130
poisoning, 1601, 1752, 1777
Cancer disease, 1610-1615, 1621, 1625
Calcium, blood, effect of lead absorption on, 60
dusts, Portland cement plant, exposure to, 797-800
Cancer, 717-749
compounds tested for carcinogenic activity, 385
dentist's role in oral detection, 121
lung tumors in mice following irradiation, 1311
methodology for survey of, 728
occupational, problems in control of, 726, 732
Candy, dermatitis among makers of, 274
Capitol, Washington, D. C., ventilation systems of, 513
Carbon dioxide, exposure of motion picture projection operators to, 478
solid, used in treatment of lymphogranuloma circumscriptum, 350
Carbon disulfide, toxicity and potential dangers, 1707
Carbon monoxide, 1116-1120, 1682-1703.

- Compensation, 651-692
- and occupational disease reporting, 1480

Compensation—Continued
claims paid for disease related to accidents, 684, 1106
Federal cases, duration and cost of, 683, 686
lists of states compensating occupational disease, 1106
of occupational diseases, report on pneumoconiosis, 802
survey information used to set rates of, 854
Control measures, engineering, 309, 417-455, 851, 855
in industry, data on, from 16 to 15 states, 608
Cooperative health programs, rural health, 1216
small plants, 1184
Copper sulfide, localization of, in polished section, 70
Correlation, partial, application to health problems, 1432
Cosmetics, dermatitis from, 170, 171, 180-181
Cosmetics and Dermatitis, 183
Costs, individual state expenditures for industrial hygiene, 1387
industrial health and medical programs, 1181, 1184, 1186
medical care, 1216
plant health service, 1187
salaries of State health department personnel, 1437
salary of industrial nurse, 1267
state support of industrial hygiene services, 1899, 1898
Cotton, acute illness among workers from, 1146-1148, 1151, 1153
mill villages, pellagra in, relation to income, 1572, 1575-1579, 1581, 1582, 1585
mills, dermatitis in, due to varnish, 131
mills, hookworm disease in, 788
pickers, malaria among, 788
Crayons, methemoglobinemia and Heinz body formation from, 1806
Creosote, dermatitis from floors treated with, 158
Cumene, metabolism of, by dog, 1808
vapors, acute effects, in mice, 1802
Cutting oil, chloruene from, 150, 172
dermatitis from, 150, 162, 163, 164, 172, 180
Cyanides and hydrogen cyanide, cyanide, cytochrome complex, 62
toxicity of, 1001, 1714
Cyclotrimethylenetrinitramine (RDX), toxicity of, 1807
Cystine and methionine, detoxication by, in dichloroethane poisoning, 1790
protective action to rats exposed to methyl chloride, 1780

DDT, 1871-1883, see also Insecticides
methylated naphthalene derivatives, solvent for, toxicity of, 1885
specificity of anhydrous-pyridine reaction for, 49
time motion study and exposure time of labor to, 1896
Delaware Lectures, 796
Dentists, and dentistry, 109-127
bibliography of, 123, 125
Dental Science and Dental Art, 103
health insurance programs, 1220
present number, number of graduates and students, 1428
qualifications, fees, and ratio of dentists to employees, 1183
services, in plant, 1183, 1184
statistical methods in, 190, 198
survey of chromium workers, 1072
Workers' Health Series and poster, 920, 930
Dermatitis, 128-216; chemical contact, 128-182; plant and food contact, 183-211; physical causes, 212-217; biologic causes, 218-238; diagnosis and prevention, 239-260
adhesive plaster, irritants in, 138
air-conditioning equipment, 355
alrythene manufacture, 151, 161
allergy, 178, 228, 284, 298, 309, 307, 308
bacteria, fungi, and animal parasites, caused by, 218-238
bluishness or marking out, 197, 201
biochemistry of skin, 270-272
books, 280, 281, 288, 291, 292, 300
candy making, 274
cases reported in 7 states, 300, 301
cushion-seat shell liquid-formaldehyde resins, 205
chloruene, 150, 168, 168, 172
chrome ulcer, 181, 182
citrus fruit industry, 142, 210
clothes, problems in proof, 689
clothing as protection against, 215
cobalt, 178, 416, 1112
compensation for, 680, 687
copperwood, contact with, 106
cosmetics, 170, 171, 180-184, 374

*Preventive Medicine in Modern Prac-
tice*, 291
*Principles and Practice of Industrial
Medicine*, 292, 575, 781
Order, evaluation of efficiency in manufac-
ture of paper, 551
Office workers, sickness among, 1592
Oil refinery, atmospheric pollution con-
trolled in, 558
dermatitis in, 137, 274
duration of illness among employees,
1612
morbidity from cancer, 717
Oils, dermatitis from cutting, 152, 153, 173
Ointment, dermatitis, preventive, 244,
248-252, 258, 260, 267
Ophthalmology, 970-979
critical fusion frequency of eye and
driving fatigue, 838
effect of light of sodium vapor lamp
on eye, 490
ocular fatigue, relation to illumination,
488
speed control for sector disks, 308
vision on the job, 400, 677
Ordnance, exposure to lead arsenate,
1063
Ordnance, see Munitions
Organ/body weight ratio for laboratory
animals, 1088, 1090
Organic compounds, analytical, 20-53;
toxicology of, 1763-1940; aliphatic,
1763-1842; aromatic, 1843-1870;
aromatic poisons, 1871-1910
chemical and physical constants and
toxicity, 1061
dust in industry, 740
vapors of, acute response of animal plus
in, 1707, 1800-1818
Organismes, professional industrial
health, location, 1183, 1184
Organismes invertebrates, toxicity of,
1892
Oxalim tetraoxide, toxicity of, 1240

- Oxygen, see also Asphyxian
anoxia, 1010, 1029
prevention of compressed air illness,
1010-1018
- Ozone, in ventilation, abstracts from lit-
erature, 458
toxicology of, 1712
- Paint, composition of trade name sol-
vents used for, 60
effect of exposure to toluene as com-
ponent of, 1831
lead poisoning in children from, 1080
respirators, efficiency of, 303
- Parasites, blood and intestinal, pathology
of, 931
- Parathion, parathionophenol in poisoning
from, 67
pilot exposure to, toxicity of, 1004
- Parazol, toxicity of, 1834
- Particle size, 90, 308, 370, 380, 390, 1077
aerol study, 1008-1072
toxicity in air pollution, and, 1073
uranium dioxide dust, relation to tox-
icity, 1078
- Particulates, coating of dust by aqueous
aerosols, 1050-1072
mineral system of, components of, 93
size, surface area measurement of, 60
small airborne, study by electric
method, 1075
volume-shape factor of, 389
- Patch test, in contact dermatitis, 234,
250, 264
- Pathology, see also Hematology, and

changes, from exposure to low pres-
sures, 1030, 1032
Clinical Pathology, 931
Histopathologic Technique, 610
historadiographic technique, 1277
lead toxicity studies, 1723, 1729
lung, 790, 820
personnel biopsy response to dusts,
900-905, 911, 927
- P.D.A. (phenyldichlorarsine) oil mixtures,
response of man to, 1907, 1908
- Pneumite workers, pneumoconiosis
among, 808, 810
- Pollages, and various factors, 1572, 1575-
1579, 1581, 1583
- Pentachlorophenol, sodium and copper,
determination of, 65
toxicology of, 1913
- Pentane, see Methyl propyl ketone
- Perfume, dermatitis due to, 274
- Personnel, 1408-1428
administrator, health, activities, 1401,
1403
chemist, duties and qualifications, 1183
dentistry, industrial, as a career, 117
dentists, present number and number
of graduates, 1428
director of vital statistics, role of, 1419
Personnel—Continued
engineers, sanitary, 1183, 1411, 1420-
1422, 1426
executives, psychiatry for, 1391
health, and group planning, 330
health department, present number of,
1428
industrial physicians, 1183, 1408-1410,
1412-1418, 1428
nurses, industrial, 1183, 1184
nurses, industrial, census of, 1254, 1258,
1360
nurses, industrial, salaries of, 1267
physicians, see Physician(s)
positions budgeted, filled and vacant,
1425
public health, program for training,
1424
scientist in Public Health Service, 1428
State health departments, salaries of,
1427
- Pero, industrial health program for, 630
industrial hygiene problems, in Bolivia,
Chile and, 658
industrial hygiene training center, 677
- PETN (penta-erythritol-tetranitrate),
toxicity of, 1808
- Petroleum, see also Gasoline, and Oil
refinery
high-sulfur, toxic gases from, 1790
solvents, photoconducting properties of,
210
- Phenol, and its derivatives, toxicology of,
1837, 1839
determination of, in urine, 47
- Phenyldichlorarsine, toxicology of, 1907,
1908
- Phosgene, toxicology of, 1061, 1713
- Phosphates, metaphosphates as source
for animal, 631
- Phosphine (hydrogen phosphide) toxic-
ity of, 1710, 1711
- Phosphorus, extinguishing fires from, 440
toxicology of, 1111, 1791
- Photodynamic hemolysis, 900-909
- Photomicrographic operators' handbook,
1293
- Photography, method for viewing koda-
chromes, 910
recording media for radioactive radia-
tions, 1283

- Physical apparatus and instrumentation,
75-94
- Physical chemistry, 95-105
- Physical examination, 980-985; posture,
980-989; impairments, 990-1000
cancer reporting and, 730
Jobsite Check with Charts, 341
preplacement, to prevent dermatitis,
281
records, measure of health, 1451, 1458
strength tests in industry, 931, 987
Workers' Health Series and poster, 310,
330

Physician(s), by State, 1183
cooperation with public health officer, 1183
duties and qualifications, 1183, 1410
estimates of future requirements for, 1418
present number, number of graduates and students, 1428
private, especially in industrial medicine, 1412, 1413
procedures for, American Medical Association, 1183, 1184
ratio to number of employees, 1183
relation of industrial physician to problems of industry, 1408, 1409
responsibility of, for industrial hygiene, 1414-1417
State health, salaries of, 1427
venomous in budgeted positions, 1423
Pitc, melanos from, 243
Plant, see also Small plant
dental service, 140, 311, 113, 120, 122, 125, 1783, 1184
in-plant medical services, 1105-1180
medical and safety services, value of, 1107, 1183, 1184, 1221
publications, use of "Jobaid Charts with Charlie" in, 341
sanitation, 518-522
Plastics, dermatitis from, 185
Polling, cadmium, hazards of, 1100, 1110
chromium, health hazard, 1000-1072
banks, ventilation of, 437, 471, 472
Plutonium, toxicology of, 1787
Phosphorus, see Lead
Pintonnium, removal of, from window, 1286, 1290
Pneumonia, and other respiratory diseases, occurrence of, 1520, 1521, 1524, 1529-1531, 1531, 1537, 1538, 1542
in steel industry, 710, 1028, 1030, 1137, 1121
medical control, 702
Pneumoconiosis, 701-811
from chemical hazards, 808
pulmonary infection in, 808, 809
response of peritoneal tissue to dusts, 800-805, 811, 827
Poisons, antidotes for, and first aid for accidents, 1049
economic, 1871-1916
Poisoning, *a Guide to Clinical Diagnosis and Treatment*, 1181
Polson-ly, histologic assay of extract, 207
dermatitis, 103, 103, 103, 280, 283, 285, 202, 300
precautions, symptoms and treatment, 200, 211
protective document for prevention of dermatitis, 211, 211
toxic principles of, 204, 208
Polysograph, use in industrial hygiene laboratory 82, 10

Potassium, static eliminators containing hazard of, 1325
Portland cement plant, health of workers in, 740, 707, 708
Posters, Workers' Health Series, 330
Post offices, studies of illumination in 481, 485, 487, 188
Posture, 186-180
Pottiosis, dermatitis from dehydration of, 213
Pottery industry, lead poisoning in, 854, 1073
 occupation analysis, 871
 silicosis in, workers' compensation for, 854
Pozz Blen air pollution episode, 501, 502
Preceptor, electrostatic, 301, 303, 401, 308, 411, 410
Pressure, atmospheric studies, 1010-1023
Printing, dermatitis among printers, 120, 340, 100, 221
 offer, government, lead exposure, 1082
Programs, health, plans of various sizes, 1183, 1184, 1188, 1189, 1225
 health, proposal, historic development of, 1215, 1220, 1221
 State and local, 1377-1407
Propylene dichloride, see Dichloropropane
Psychiatry, catalogue of mental health pamphlets and reprints, 1230
 effective programs, outline of, 1227
 for executives, group analysis, 1231
 mental health practices in industry, 1238
 psychologic basis of personal problems of workers, 1220

discussion of, 714
for mercury and chromates, 709
noxious gases and fumes, 1663
toxic dusts and gases, 604, 607-610
Tin, toxicology of, 1061, 1757
TNP, see also Nantions
aplastic anemia due to, 608
determination in air, 31, 42
metabolites of, 1840
neurologic symptoms from, 600
occurrence of Heinz bodies in blood of workers, 600
poisoning, 600-602, 604, 605, 1838-1839
poisoning, literature review, experimental, 1839
poisoning, prevalence and control, 603, 607, 1834
safe handling of, 1838
urinary urine test for exposure, 605
Tobacco, "reader" in cigar factories, 323
analytical control of nicotine, 818

- Toluene, acute toxicity of, 1832
determination in air, 1, 2, 4, 30, 33, 30,
58
effect of exposure to, 1845-1851
maximal permissible concentration,
1830
- Tubiflue blue, blood dyscrasia in mice
ingesting, 1841
- Toxicology, 1047-1010; general, 1047-
1004; aerosols, 1005-1070; labora-
tory animals and equipment, 1090-
1001; inorganic gases, 1002-1714;
metals, 1715-1762; organic, ali-
phatic compounds, 1703-1832; or-
ganic, aromatic compounds, 1833-
1870; economic poisons, 1871-1910
aliphatic alcohols, 1830
aliphatic and aromatic hydrocarbons,
1651, 1655
amino and nitro compounds, 1833-1842
aromatic amino and nitro compounds,
1835
benzene, benzene derivatives and ben-
zenes, 1844-1890
beryllium, 1715-1730
carbon monoxide, 1602-1702
cellaria, organ/body weight ratios for
animals, 1088, 1090
DDT, 1871-1892
economic poisons other than insecti-
cides, 1907-1910
halogenated hydrocarbons, 1703-1802
Industrial Toxicology, 1001
inorganic industrial hazards, 1658, 1659
insecticides, 1871-1900
lead, 1721-1738
molybdenum, 1734
nitro and nitrile compounds, 1802-1803
nitrous fumes, 1700
particle size and, in air pollution, 1073
selenium, 1730-1747
toluene, 1830
- Tracheoma in steel mill workers, 570
- Trade name solvents, composition of, 50
1,1,1-Trichloro-2,2-bis (p-chlorophenyl)
ethane, see DDT
- Trinitrotoluene, see TNT
- Tri-State district, silicosis and tubercu-
losis among miners, 824, 825, 830,
837, 932
- Truck drivers, fatigue and hours of serv-
ice, 887
- Tuberculosis, 750-770
and silicosis among miners, 824, 825,
830, 837, 932
handbook for photofluorographic op-
erators, 1263
mass screening for, 904
safety measures in laboratory, 926
Tuberculosis in Industry, 764
- Tunnels, carbon monoxide in, 1126, 1128
railroad, air contamination in, 456, 1044
threshold limit of toxic gases in, 604
vehicular, ventilation of, 466
workers in, epidemic of boils among,
222
- Ultraviolet radiation, 1335-1370; biologic
studies, 1335-1301; aerobiologic
studies, 1362-1378
and illumination, measurements of, in
cities, 402
effect of, 50, 215, 517
effect on opacities in dermatophytes,
232
- Uranium, and atomic power, 601
cancer, experimental in rats, 740
dioxide dust, relation of particle size
to toxicity, 1078
ionization of, in polished section, 71
minerals, radiocellulose aggregates in, 73
miners and miners, health of, 1382,
1383
- Urine, and blood, changes due to fatigue,
878
and seminal fluid, examination of, 681
catechol, phenol and hydroquinone, de-
termination in, 47
chromium, determination in, 1072
excretion of silica, 842
nitrate determinations to control bee-
zone exposure, 435
- Vanadium, toxicology of, 1650, 1661, 1750,
1757, 1760
- Varnish, dermatitis in cotton mills due
to, 134
- Veneral disease, 771-786
nursing in industry, 1248
- Ventilation, 450-470, 510-517
exhaust hood, 365, 377, 381
exhaust system, 371, 401, 408, 470, 477
in butters' fur-cutting industry, 1092,
1093, 1097, 1098
in tunnel, 453, 454, 1044, 1125, 1126
mine, physiologic factors in, 949, 954
of vehicular tunnels, physiologic tests,
1095-1097
physiologic basis of, 1031
polishing shop exhaust system, 417
systems in Capital, Washington, D. C.,
513
systems, transmission of bacteria, 512,
514, 515
- Veterinary science, importance in indus-
trial hygiene, 1001
- Vibration, air hammer, effects of, 481, 482
- Vigilantism intoxication, necrosis of kid-
ney in, 1808
- Vinyl chloride, acute response of guinea
pigs to, 1390
- Vinyl cyanide, see Acrylonitrile
- Vision, see Ophthalmology
- Voluntary health insurance, coverage
and services, 1218, 1220, 1222-1224
related to industrial medical programs,
1230, 1222
- War, see also Militaries
activities, Public Health Service, 574,
580, 605, 624
and tuberculosis control, 706, 708
industrial hygiene in, 585, 610, 612,
610-622, 635, 636, 605, 601

- War—Continued
influence on industrial hygiene, 632,
657, 662
medical services in, 1170, 1171, 1176
physical status, men examined through
Selective Service, 1000
research in Division of Industrial Hy-
giene, PH8, 620
- Warning agent, acrolein, for methyl
chloride leak, 428
for fuel gases, 420, 430
- Wastes, industrial, disposal of radioac-
tive, 1285, 1282, 1300
removal of plutonium from, 1290, 1290
toxicity to fish, a review, 1002
- Water, determination of toxic materials
in, 10, 25
drinking, standards for, 701
drinking, toxic contaminants of, 1082
ultrate-contaminated, 1870
recommended sanitation practice for,
530
works, health hazards, 433, 532
- Wax, halowax acne among electricians,
170, 180, 188, 172
- Welders and welding, and cutting opera-
tions, safety in, 451
are, health of, in steel ship construc-
tion, 1130
determination of iron in fume, 19
fluoride and chromium exposure, 478
Workers' Health Series and poster,
318, 320
- Weight, abnormal, study of medical ex-
amination records, 630
average, scales for calculating devia-
tion from, 1438
deviation from average, method for ob-
taining, 1439
height and, relation to blood pressure,
1004
- Women, age of white and Negro workers,
1054
age of workers by geographic region,
1052
conference of Women's Advisory Coun-
cil, 588
health status, 1000
in industry, employment, working con-
ditions, hours of work, 630
occupational problems of housewives,
1157
physiologic considerations, clothing,
absenteeism, 630
sanitary survey of industries employ-
ing, 619
sex differences in physical impairments
of adult life, 604
- Wood, dermatitis from Brazilian walnut
wood, 104
mahogany, dermatitis from, 100
- Woodworking industry, health hazards
in, 1140
- Woolen mill, dermatitis occurring in, 180
- Workers, age of, in United States, 1050-
1064
disability table for, 1430, 1610
immunization program for, 1172
income cycle in life of, 1583
number exposed to toxic materials, 008
number having health services, 1183,
1184
number of, by plant size, 1183, 1184
number of employers providing serv-
ices to, 1183, 1184
personal problems of, 1220
principal causes of death among, 1611
Workers' Health Series and posters, 311-
322, 330
- X-ray, biologic studies, 1300-1310
chest examination and tuberculosis
death rate, 770
control of temperatures of film-pro-
cessing solutions, 821
diffraction data, graphical interpreta-
tion of, 80
efficiency of methods in tuberculosis
detection, 700
evaluation of a chest reservoir, 708
exposure in manufacture and operation
of electronic tubes, 1331
film copying, 817
findings in silicosis, 824, 841, 855
handbook for photodurographic oper-
ators, 1208
in industry, 1278, 1301
mass-screening techniques, 841
protection of personnel, 1200, 1272,
1273, 1288, 1289, 1305, 1322
size-fitting fluoroscopes, hazard of,
1320
summary for United States of ex-
posure due to, 1320, 1331
- Xylolite, hazards in bleeding gumming,
1820
liver function tests in detecting dam-
age due to, 1855
pathologic effect in fasting animals,
1858
toxicity of, as compared with nallite,
1850
- Zinc, dust fumes, extinguishers for, 421
hygienic properties of, 1750, 1755
miners, silicosis among, 824
oxide in metal fume fever, 1101, 1108-
1109
oxide workers, dermatocouosis among,
128
phosphide, toxicity of, 1711
pilot survey, Donora smog episode,
553
